ORDERING INFORMATION

General

- All materials in this catalog are available for any member to utilize.
- Videos will be shipped by FIRST CLASS mail and must be returned by FIRST CLASS mail.

DVD’s & Video tapes

- DVD’s and videos should not be kept for more than 3 working days (excluding shipping time). If needed for a longer period of time please call staff and determine if video is reserved for another member.
- Users of DVD’s and videos will be held responsible for replacing lost or damaged videos.
DVD’s & VIDEOS

SUMMARY DESCRIPTIONS

SECTION 1: LOSS CONTROL EVALUATION RELATED SAFETY VIDEOS BY TOPIC

HAZARDOUS MATERIAL COMMUNICATION / MSDS

HAZ-2 HAZARDOUS MATERIALS - YOUR RIGHT TO KNOW (10 minutes) 2003
VHS & DVD
The video provides basic knowledge for anyone who handles chemicals or works in areas where hazardous materials may be present.

HAZ-3 HAZCOM: YOUR RIGHT TO KNOW (17 minutes) 2006
DVD ONLY
Hazardous substances in the workplace can cause injuries ranging from slight skin irritations to cancer to birth defects. The key to working safely with these chemicals is having all pertinent information about their hazards readily available. Hence, the federal government issued the Hazard Communication Standard, commonly known as the "Right-To-Know" law.

HAZ-4 CHEMICAL SAFETY BOARD ACCIDENT INVESTIGATIONS
DVD ONLY
This program contains the investigation reports from several explosions, fires and other hazards investigated prior to March 2007. This includes a waste water plant explosion in Florida, the St. Louis Praxair propylene cylinder fire and safety information on NaHS and Nitrogen, among others. Each topic can be viewed separately and last from 6 to 25 minutes.

HAZ-5 HAZARD COMMUNICATION FOR PUBLIC EMPLOYEES (19 minutes) 2008
DVD ONLY
This important training program will help train your employees on how to work safely with the hazardous substances found in their workplace. Keep your organization in compliance with OSHA standard 1910.1200 and your workers safe. It covers: •Physical and health hazards •How exposure occurs •PPE •MSDS •Chemical containers warnings and labels.

HAZ-6 HAZARD COMMUNICATION: TRAINING FOR EMPLOYEES (17 minutes) 2010
DVD ONLY
This program explains how employees can work safely with chemicals by understanding the key elements of your organization’s Hazard Communication Program. In our jobs, we may work with chemicals that are hazardous, but we don’t have to place ourselves in danger. When armed with proper training and access to a chemical’s hazard information, each of us has the ability to work with or handle these chemicals in a safe manner. By following the Hazard Communication Program, reading chemical labels and Material Safety Data Sheets, and following the safe work practices listed, workers create a successful formula for chemical safety.

HAZ-7 HAZARD COMMUNICATION & THE GLOBAL HARMONIZING SYSTEM
(22 Minutes) 2013
DVD ONLY
Recent changes to the OSHA Hazard Communication Standard have brought the associated OSHA regulations more in line with the international hazard communication standards with the implementation of the Globally Harmonized System or GHS. The Global Harmonization System helps ensure improved quality and consistency in the classification of all chemicals and chemical labels, which in turn improves an employee’s ability to quickly understand the OSHA Hazard
Communication Standard. This video will cover the 16 Classes of Physical Hazards, the 10 Classes of Health Hazards and the 16 Sections of Safety Data Sheets (SDS). This video will also help explain OSHA’s MSDS Sheets required by the original OSHA Hazard Communication Standard that now have a standardized format and are called Safety Data Sheets (SDS) as part of the Global Harmonization System.

HAZ-8
THE U.S. CHEMICAL SAFETY BOARD (CSB) – SAFETY VIDEOS 2014
DVD ONLY
This DVD contains a number of short safety videos. Below is a short description of each.

Public Worker Safety: Wastewater Plant Explosion (7:45 Minutes)

Explosion and Fire at Formosa Plastics, Illinois (10:45 Minutes)

Hazards of Nitrogen Asphyxiation: Fatal Accident at the Valero Refinery (12:06 Minutes)

Fire and Explosions at Formosa Plastics, Texas (8:34 Minutes)

Dangers of Propylene Cylinders in High Temperatures: Fire a Praxair, Missouri (8:20 Minutes)

Ethylene Oxide Explosion at Sterigenics (9:25 Minutes)

Dangers of Flammable Gas Accumulation: Acetylene Explosion at ASCO (6:49 Minutes)

Explosion at BP Refinery (6:14 Minutes)

Preventing Harm from Sodium Hydrosulfide (NaHS) (6:41 Minutes)

HAZ-9
HAZARD COMMUNICATION, THE GHS & YOU (15 Minutes) 2016
DVD ONLY
This video features four real-life scenarios that underscore the importance of being able to quickly obtain health, safety and hazard information related to hazardous chemicals and substances in the workplace. As mandated by OSHA, chemical safety data must be conveyed through the use of the standard communication elements found in the Globally Harmonized System for the Labeling and Classification of Chemicals, commonly called the GHS for short. The program explains each of these communication elements in detail so your employees will understand how chemical hazards are communicated and how to use this information to ensure their safety when storing, handling and using hazardous substances. Items discussed include: What basic information can be found on a chemical label, which pictograms are used to convey Physical, Health/Environmental Hazard, and what severity of hazard the signal words of Danger and Warning indicate.

HARASSMENT

HAR-1
SEXUAL HARASSMENT IN THE WORKPLACE (14 minutes)
DVD ONLY
Various types of sexual harassment are discussed and examples of role playing are shown. This video is a basic review for all types of employees and supervisors.

HAR-2
MADE IN THE USA - DIVERSITY IN THE WORKPLACE (25minutes) 2003
VHS ONLY
Anti-Harassment video that highlights the positives of cultural differences.

**HAR-3**  
**SEXUAL HARASSMENT: WHAT YOUR EMPLOYEES NEED TO KNOW (8 minutes) 2004**  
VHS & DVD  
Sexual harassment is against the law and costly to all those involved. This video includes the definition of sexual harassment/workplace examples, how your employees can confront a harasser, and reporting harassment: encourage internal reporting, rather than involving legal system.

**HAR-4**  
**HARASSMENT IN THE WORKPLACE: EMPLOYEE AWARENESS (18 minutes) 2005**  
DVD ONLY  
Working relationships built on respect are productive and essential for a business to succeed. However, when an employee is the victim of harassment of any kind; there are negative effects for the individuals involved as well as for the whole group. Anger, hurt feelings, fear and resentment undermine morale and impair teamwork. This video answers some of the common questions and doubts on the subject, defines harassment and demonstrates various types of it via dramatizations, describes how individuals might feel when they are being harassed and discusses how the victim should handle the situation.

**HAR-5**  
**SEXUAL HARASSMENT FOR THE 21ST CENTURY (21 minutes) 2009**  
DVD ONLY  
This award-winning video (CINE Golden Eagle) reflects the most recent Supreme Court rulings on sexual harassment, as well as the other aspects from those cases outside of corporate responsibility. It defines what sexual harassment is, depicts examples of common types of sexual harassment situations, outlines possible personal consequences that may result for both the victim and accused, addresses appropriate measures that an individual might take to put a stop to the harassment, and gives general advice regarding the parameters of acceptable behavior in a work environment.

**HAR-6**  
**SEXUAL HARRASSMENT: A COMMON SENSE APPROACH (18 minutes) 2010**  
DVD ONLY  
Isn’t it just amazing? Even after huge settlements and attention-grabbing headlines, sexual harassment continues to occur in our workplaces. This DVD is designed to help you and your employees with both the grey areas and the obvious. You’ll see realistic scenes that are clearly sexual harassment, and others that are probably just a lapse in good judgment. Either way you will learn proven techniques that help you respond appropriately and in compliance with the law. A workbook is available with this DVD.

**HAR-7**  
**PREVENTING HARASSMENT: CREATING A POSITIVE WORKPLACE (Industrial Version) (21 minutes) 2011**  
DVD ONLY  
Good communication and respect for others creates a beneficial work environment where employees feel safe and productive. When the workplace is disrupted by someone disrespecting one or more co-workers, anger and resentment can destroy morale. Workplace harassment can damage relationships and destroy lines of communication among employees. This video discusses various types of workplace harassment and how this unwelcome behavior affects the work environment. It also explains what you should do if you are a victim or an observer of disrespectful conduct and how you can avoid having your own behavior interpreted as harassment. Featured are a variety of scenarios where employees exhibit unwelcome behavior and what types of behavior constitute harassment and how they should respond to such conduct.

**HAR-8**  
**IT’S ABOUT RESPECT – RECOGNIZING HARASSMENT IN A DIVERSE WORKPLACE (21 Minutes) 2014**  
DVD ONLY  
When it comes to the delicate issue of harassment, make sure that your employees never cross the
line. Raise awareness with this program and explain the dos and don'ts of creating a respectful, more harmonious and productive workplace for everyone. This video will define harassment, identify the various types of harassment, help to understand the financial impact and provide helpful guidelines to prevent harassment.

**BLOOD BORNE PATHOGENS**

**BBP-4**  
**BLOODBORNE PATHOGENS (19 minutes) 2000**  
VHS ONLY  
The video covers new terminology & Body Substances & and & Standard Precautions & plus a new approach to meeting the OSHA training requirements. The video discusses HBV, HCV and HIV. The various modes of transmission, infection and exposure control, PPE, signs and labels are also reviewed.

**BBP-5**  
**PROTECTING AGAINST HEPATITIS B (5 Minutes)**  
VHS ONLY  
Hepatitis B could be a life-threatening blood borne pathogen that infects a quarter million people every year. Precautions, vaccination, training and counseling for protecting against Hepatitis B in the workplace.

**BBP-7**  
**BLOODBORNE PATHOGENS: WHAT EMPLOYEES MUST KNOW (18 minutes)**  
VHS ONLY  
This excellent new program teaches your employees the hazards of bloodborne pathogen exposure and how to practice appropriate protective measures. Discusses the critical techniques for dealing with work-related accidents and emergency first-aid situations. Bloodborne diseases and workplace transmission, sanitary issues and safe work practices, PPE and vaccinations, reducing the risk to exposure and housekeeping.

**BBP-8**  
**BLOODBORNE PATHOGENS: TAKE PRECAUTIONS (12 minutes) 2003**  
VHS ONLY  
This video covers the three main bloodborne pathogens -- HIV, HBV and HCV -- and their definitions, symptoms and routes of transmission. Safe responses to accidents and injuries are covered, as well as common sense precautions to prevent the spread of infection at work. § HIV, HBV and HCV § Transmission § Accidents and injuries § Common sense precautions. Includes an employee handbook and Leader's Guide.

**BBP-9**  
**BLOODBORNE PATHOGENS (11 minutes) 2006**  
DVD ONLY  
Whether you work in transportation, manufacturing, retail, government, emergency services or any other occupation; one day you will have to deal with a situation that involves potentially infected blood. The decisions you make and the actions you take could literally make the difference between life and death.

**BBP-10**  
**BLOODBORNE PATHOGENS FOR LAW ENFORCEMENT (20 minutes) 2008**  
DVD ONLY  
As law enforcement personnel, you face dangers every day. The transmission of bloodborne diseases doesn't have to be one of them. This program reviews the essential elements of exposure control. It covers:  • HBV, HIV and AIDS  • Infectious material  • Work controls, housekeeping

**BBP-11**  
**BLOODBORNE PATHOGENS: TRAINING FOR EMPLOYEES (18 minutes) 2010**  
DVD ONLY  
Many workers make the mistake of thinking that only healthcare providers are at risk from exposures to bloodborne pathogens, but almost all employees in the workplace can be exposed, often when they least expect it. To protect themselves from these microorganisms, employees
must receive training and learn specific precautions, which is the purpose of this new program. Viewers will learn the hazards associated with bloodborne pathogens and how to protect themselves from exposures to these hazards by following universal precautions in each potential exposure situation.

**BBP-12**  
**BLOODBORNE PATHOGENS: THE UNEXPECTED HAZARD (14 Minutes) 2016**

Bloodborne Pathogens are sometimes called the “Unexpected Hazard” because for most of us, we just don’t expect to come into contact with blood or bodily fluids when performing our normal job duties. Nevertheless, an unexpected encounter with Bloodborne Pathogens can happen at any time. Responding properly when confronted with blood and other bodily fluids is critical to your health and safety. Items covered include: The definition of Bloodborne Pathogens, occupational exposures, exposure control plan, universal precautions rule, how to handle disposal, disinfection of potentially infectious materials and how to properly respond to an exposure.

**CONFINED SPACE ENTRY**

**CSE-1**  
**CONFINED SPACE ENTRY: INSIDE MANEUVERS (23 minutes) 2003**

Working in a confined space is a lot like working in a submarine. Space is tight, atmospheric conditions are critical, and potential hazards abound. This dynamic program uses the USS Atlanta, a United States Naval submarine, and its crew as a dramatic backdrop to compare the dangers of working in a submarine to that of working in a confined space. The Trainer’s Toolkit contains an employee handbook, an expanded leader’s guide, and several overhead transparency masters. Space hazards, Atmospheric testing, Confined space entry permit requirements, PPE, Rescue, Team responsibilities.

**CSE-2**  
**WORKING SAFELY IN CONFINED SPACES (15 minutes) 2003**

Overview of safe confined space entry. Testing for hazardous, explosive and oxygen deficient atmospheres. Ventilation, monitoring and safe work practices.

**CSE-3**  
**LIFE AND DEATH: CONFINED SPACE SAFETY (19 minutes) 2006**

This video has a very unique approach where it starts on the scene of an accident and works backwards. With the characters and audience playing the part of an accident investigator, they use the clues to solve the mystery of how the incident occurred. This film has proven to be a highly effective training tool through its scared-straight, graphic nature.

**CSE-4**  
**CONFINED SPACE CASE HISTORIES (14 minutes) 2008**

In this video program, re-enactments of real-life confined space accidents emphasize the importance of following proper confined space safety procedures. Once your workers see and hear these gruesome stories, they will be hard-pressed not to follow proper procedures. It covers: •Safe atmospheric testing and monitoring •Training the entry team •Ventilation •Personal protective equipment.

**CSE-5**  
**CONFINED SPACE SAFETY (15 minutes) 2010**

Employees must sometimes work in areas which have configurations that don’t allow for regular safety precautions. In these spaces, employees may be forced to work very close to hazards. Proper guarding may not exist to prevent falls and the air may be toxic or explosive. In addition,
such an area may not have an easy way to exit should an emergency arise. Learning how to work in these spaces more safely is the purpose of this video.

CSE-6
DVD ONLY

SURVIVE INSIDE: EMPLOYEE SAFETY IN CONFINED SPACES (20 Minutes) 2013

Confined spaces can be dangerous, but they don't have to be. This program explains why entering confined spaces can be so hazardous and how those hazards can be controlled by following proper confined space entry procedures. Viewers will also learn valuable lessons from a reenactment of a poorly-conducted confined space entry in which three lives are needlessly lost.

- What non-permit and permit required confined spaces are.
- How the entry permit system works to ensure worker safety while entering, working in or exiting a confined space.
- The four types of atmospheric hazards and how atmospheric testing and monitoring is conducted to ensure a space is safe for entry and occupancy.
- Which other dangers besides atmospheric hazards may exist in a space and how hazards may be controlled.
- What the responsibilities of the Entry Supervisor, the Attendant and the Entrants are.

TRENCHING & SHORING

TS-1
VHS ONLY

UNDERGROUND SAFETY - TRENCH SHIELDS (12 minutes)

Covers rules for installing and moving trench shields. Routine inspection and how to check for trouble signs like corrosion and broken welds.

TS-3
VHS & DVD

TRENCHING & SHORING SAFETY UPDATE (12 minutes)

Meet training requirements for trenching. Avoid dangerous cave-ins and other accidents: Definitions of trench and excavation, support systems, angle of repose and trench boxes, stress factors, including weather, soil conditions, vibration/shock, early planning and testing, shoring installation, inspection and removal, oxygen deficiency and emergency evacuation.

TS-4
DVD ONLY

TRENCH EMERGENCY (16 minutes) 2008

This program reviews the dos and don'ts of trench rescue and can help save the lives of both the person in the trench and the would-be rescuer. It covers:  •Shoring and shielding  •Examines an actual cave-in  •Preparing for the rescue team.

TS-5
DVD ONLY

TRENCHING & EXCAVATION, THE SCOTT MAY STORY (19 minutes) 2009

Trenching and excavation work--it's the starting point of most construction projects. Before you dig, there's a lot you need to know, because the risks, just like the weight of the soil, are too great to take a chance. This type of work is dangerous, with more than 100 workers killed in trench accidents each year. So if you work in a trench or excavation, no matter what your job, you need to know the safety requirements and that's the purpose of this program.

TS-6
DVD ONLY

CAVE-IN! TRENCHING AND SHORING SAFETY (18 minutes) 2011

Working in trenches can be dangerous! Every year about 400 U.S. workers die in trenches and 6,400 are seriously injured doing the work our members do every day. Soil is heavy and it may fall in at any time if not managed properly. When excavation sites are unsafe, workers risk injury or death. Protect yourself by learning more about trench soil, trench protective systems, atmospheric hazards and safety practices for excavation work. The following are
reviewed in the video: classifying soil, manual testing, protective systems, hazardous atmosphere, and general safety in excavations. Knowing as much as you can about your working conditions can help you work more safely.

LOCKOUT / TAGOUT

**LOCKOUT/TAGOUT SAFETY TRAINING FOR EMPLOYEES (15 minutes)**

This program can help you easily train your employees on proper lockout/tagout procedures, as required by OSHA under 29 CFR Section 1910.147. Focuses on procedures from shutdown to start-up making it easy to combine with your existing training program, or use for retraining as mandated by OSHA.

**LOCKOUT TRAGEDY VIDEO (15 minutes) 2003**

This high-impact video program, part of our brand-new "Danger Zone" reality series, retells the tragic story of a young worker who lost his life in an avoidable on-the-job accident involving improper lockout procedures. It will emphasize to your employees the importance of following safe work practices.

**HIGH IMPACT: LOCKOUT/TAGOUT SAFETY (19 minutes) 2006**

This dynamic video shows viewers that a commitment to lockout / tagout safety is the key to maintaining an injury-free workplace or even saving ones life. Filled with re-creations of actual accidents from OSHA files, this film has proven to be a highly effective training tool through its scared-straight, graphic nature.

**LOCKOUT/TAGOUT LIGHTNING IN A BOTTLE (14 minutes) 2008**

Fatal injuries occur when hazardous energy is released and safety precautions are not in place. Never allow that to happen. Bottle up that uncontrolled energy, train your employees and boost your lockout/tagout measures with this shockproof program. Kinds of energy lockout/tagout can control, Lockout/tagout basics, OSHA’s LOTO standard, Six steps of lockout/tagout

**LOCKOUT / TAGOUT: TRAINING FOR EMPLOYEES (18 minutes) 2010**

Being around energy is an every day part of our lives, and an important part of our workplace operations. High pressure steam, electricity, hydraulic and pneumatic systems, even the force of gravity are common forms of energy used to power our machines. While energy is obviously useful, it can also be dangerous. Understanding how to properly control hazardous energy is one of the keys to workplace safety.

**LOCKOUT/TAGOUT SAFETY (20 minutes) 2011**

Describes the use of tags and locks to block the accidental or purposeful use of switches or other gear used to energize or power a piece of equipment. Authorized employees and effected employees are two groups of employees that should know the safety rules and policies of the municipality. This video helps all employees to know when and how equipment should be locked out during service.

**MORE HIGH IMPACT: LOCKOUT/TAGOUT SAFETY TRAINING (21 Minutes) 2012**

This compelling video stresses the importance of a properly designed lockout/tagout program. Within your city, only authorized locks and tags may be used on your equipment. Before
attaching a tag, the video indicates the proper name and date should be written on the tag. The video outlines the steps for properly installing a lockout and tagout system including: notifying all employees affected by the inoperability of a certain piece of equipment, which equipment is involved, the purpose of the shutdown, the actual process of isolating power or any mechanism providing movement to the equipment, the shutting off of all disconnects, shutting off of selector switches (keeping in mind there may be more than one power source), placing a proper tag and lock on the equipment and testing to verify the equipment is safe to work on. The process is sometimes condensed down into LOCK, TAG, and TRY. The video contains graphic and non-graphic versions.

FALL PROTECTION

FP-1  PERSONAL FALL PROTECTION (13 minutes)
VHS ONLY
In this video, employees are informed that most falls resulting in injury are from a distance of ten feet or less. Most falls happen while doing normal job tasks. Personal fall protection systems are designed to prevent or reduce the distance that the employee falls. The three main components of a personal fall protection system are reviewed which include the harness, lanyard and the anchorage.

FP-3  FALL ARREST SYSTEMS (15 minutes) 2007
DVD ONLY
Whether you use a personal fall arrest system every day or only once in your life, this is for certain: the system won't do any good unless it is used properly. The basics of the "ABC's" of the fall arrest system: Anchor point, Body Harness and Connecting Device. How the three components of a personal fall arrest system work together to prevent injuries and death. How to properly select, inspect and use fall prevention equipment. How to calculate the fall distance between the anchor point and the maximum elongation of the connecting device. Why it is so important to choose a safe, legal tie-off point.

FP-4  HIGH-IMPACT: FALL PREVENTION (20 minutes) 2010
DVD ONLY
Falls are one of the most underrated hazards on the job. Employees can prevent most of these accidents if they make a conscious effort to protect themselves in situations where slip, trip, and fall hazards are present. There are 10 accident recreations in this video that will show employees taking short cuts, and other common safety mistakes, that can cause injuries or even death.

FP-6  SURVIVING THE FALL: YOUR PERSONAL FALL ARREST SYSTEM (20 minutes) 2012
DVD ONLY
The personal fall arrest system is comprised of the anchor point, connecting device and full body harness. Each of these is critical to the successful operation as a whole. The harness must be able to support 5,000 pounds of weight thus making the anchor point that much more important. The force put upon the anchor point is very high thus the 5,000 pound weight rating. The video covers the proper use of snap hooks and reasons for not using your fall protection rope for other purposes. The video indicates a 225 pound person falling from a distance of six feet generates 2,500 pounds of force when stopping suddenly. The video also covers self-retracting lifelines.
DRUG & ALCOHOL AWARENESS

DA-1
RECOGNIZING DRUG AND ALCOHOL ABUSE FOR EMPLOYEES (18 minutes) 2008
DVD ONLY
Do you know an alcoholic or an illegal drug addict? Chances are good that you do – chances are good that you work with one, too. This important video program will help employees recognize alcoholism and drug abuse among their peers in the workplace and it will give them ways to deal with it. • Recognize substance abuse • Handle suspicion of drug and alcohol abuse • Stop enabling and denial.

DA-2
DRUG FREE WORKPLACE: EMPLOYEE PROGRAM (25 minutes)
VHS ONLY
This video is for employees and discusses and answers the most commonly asked questions related to drug and alcohol testing and programs. It reviews how abuse on the job hurts everyone and the benefits of a drug-free workplace.

DA-3
REASONABLE SUSPICION TRAINING FOR SUPERVISORS – PACKAGE  2006
VHS ONLY
- Reasonable-Suspicion Alcohol Testing Video (56 min)
- Reasonable-Suspicion Drug Testing Video (41 min)
The importance of reasonable suspicion testing can’t be emphasized enough. The supervisor is the first line of defense to protect employees, the employer, and the public at large if an employee is impaired by drugs or alcohol. This training will prepare supervisors beyond the basics for that important role. The videos incorporate input from supervisors with actual day-to-day experience to teach you what you really need to know. It answers your questions clearly, and the "what-if" scenarios are based on actual situations experienced in the field. It includes the role of the supervisor, observations a supervisor needs to make, signs and symptoms of probable alcohol misuse, signs and symptoms of probable drug use, how to approach an employee you reasonably suspect of being impaired, refusals to test, when to test and when NOT to test, and how to conduct testing.

DA-4
DRUG FREE WORKPLACE: EMPLOYEE VERSION (29 minutes) 2007
DVD ONLY
This program is divided by topics, and will help answer some of the most commonly asked questions about a Drug Free Workplace. Use all or partial segments to tailor the video to your training session. The prevalence of substance abuse in the workplace. The disease of alcoholism and drug abuse. How abusers rationalize their habits. Work behaviors of employees who are "using" on the job. Six occasions for testing, the testing process and the employee's rights. Common myths on how to "beat" the tests.

DA-5
DRUG & ALCOHOL TESTING: YOUR RIGHTS & RESPONSIBILITIES (19 minutes) 2011
DVD ONLY
Ease the worries and assuage the doubts of your employees about drug and alcohol testing. This video explains how and when the tests are conducted, what employees can expect, what they should do, what the MRO is for and how the test facilitators will go about the process. Through this video, you can prepare your employees and inform them of their rights and responsibilities.

<tr>
<td>DD-22</td>
<td>DISTRACTED DRIVING: AT WHAT COST? (15minutes) 2007</td>
<td>15 minutes</td>
<td>2007</td>
<td>DVD ONLY</td>
<td>Most drivers are unaware of how often they are distracted from the most important task at hand - driving the vehicle safely. This program is designed to raise a driver's awareness of the potentially tragic consequences of driving while distracted. Driver distraction is a factor in up to 50% of vehicle crashes. A wide variety of distracting devices, such as: cell phones, radios, CD players, fax machines, navigation systems, entertainment centers, etc. Today's fast-paced life creates pressure for employees to conduct other tasks while driving. Two police officers respond to the site of an accident to investigate its cause. After the questioning of the involved drivers and their statements, it is determined that both drivers were at fault and the accident could have been avoided had they not been distracted. Provides a course of action to prevent distractions and help keep attention focused on driving.</td>

| DD-23 | DRIVEN TO DISTRACTION (20 minutes) 2008                               | 20 minutes | 2008       | DVD ONLY | Driving distractions cause crashes. This groundbreaking program will point out exactly how dangerous distractions in the car can be. The main character is the embodiment of distractions such as cell phones, food and drink, make-up, briefcases and many more. He delights in distracting drivers and causing accidents – from fender-benders to fatal crashes. After watching
this, you and your employees will be far more focused behind the wheel. It covers: • Cell phones vs. drinking and driving • Eating and drinking in the car • Road rage • When eyes leave the road

**DD-24**

**P.U.R.S.U.E. (20 minutes) 2008**

This video is intended to heighten your awareness of those factors involved in pursuit decision making. Improved understanding of what pursuits involve will allow you to respond more effectively and to reduce the dangers - the deaths, injuries and crashes - which so often occur. Developed and produced by the IACP (International Association of Chief’s of Police).

**DD-25**

**IMPLEMENTING A SAFE DRIVING PROGRAM (28 minutes) 2010**

Learn how to implement a comprehensive driving program. The program will improve your awareness of safe driving by identifying at-risk behaviors. The video identifies seven important parts to this driving program, which include, checking MVR’s, classroom training, preventive maintenance, vehicle inspection, conducting driver field evaluations, seat belt monitoring, and accident review.

**DD-26**

**CELLULAR PHONES: A DEADLY DISTRACTION (53 minutes) 2012**

Presented by David Teater with the National Safety Council this DVD covers statistics and defensive driving behaviors related to the use of a cellular phone. Whether it entails talking on the phone, or driving while texting, both can be deadly in an instant. Mr. Teater tells a very personal story where his child was killed by a distracted driver. Also covered is inattention blindness and the phenomenon of looking, but not seeing.

**DD-27**

**HANG UP AND DRIVE: THE JACY GOOD STORY (18 Minutes) 2013**

This dynamic program features Jacy Good and her fiancé Steve recalling the tragic crash that killed her parents as a result of another driver using his cell phone. In May 2008, Jacy and her parents were enjoying a great day of accomplishment...Jacy's college graduation. That day was shattered, however, when a devastating collision took the lives of Jacy’s parents and left her in a coma. Her brain injury has left her with physical, speech, and cognitive impairments, but Jacy’s story is an inspiration. This video will help viewers recognize the real dangers of cell phones and other driving distractions.

**DD-28**

**PREVENTING MOTOR VEHICLE COLLISIONS (20 Minutes) 2016**

Martin Lesperance, a veteran firefighter and paramedic, is back in his third film talking about something that affects almost all of us: driving. In this motivational program, he recalls stories of the collision scenes he has attended during his 22 years of experience. In almost every case, the accidents were predictable and preventable. This video will cover physical distraction, mental distractions, danger of diving while sleepy, how speed can kill, the importance of looking before backing and how seatbelts save lives.
SECTION 2: OTHER SAFETY VIDEOS BY TOPIC

ACCIDENTS & ACCIDENT INVESTIGATION

ACI-1  
ACCIDENTS AREN’T JUST ONE OF THOSE THINGS (20 minutes) 2004  
VHS & DVD  
This program Martin Lesperance shares his experiences and stories to address important safety issues that all employees need to hear. It includes: Accidents aren’t just one of those things, We all have reasons to work safely other than just ourselves, Why we must wear personal protective equipment, If you notice a dangerous situation fix it and Think of the repercussions of our actions.

ACI-2  
ACCIDENT INVESTIGATION FOR EVERYONE (22 minutes) 2010  
DVD ONLY  
Accident investigations are a key component of an effective safety process, but very few investigations achieve their intended purpose. All too often the focus of an investigation is finding someone responsible for an incident, but it should really be about finding facts, finding real causes, and finding the fixes that will prevent the incident from happening again. You will learn how to recognize common mistakes made during an investigation and everyone will better understand their role in this process.

ACI-3  
ACCIDENT INVESTIGATION: DON’T PLAY THE BLAME GAME (25 Minutes) 2014  
DVD ONLY  
This video describes the key steps in the accident investigation process and emphasizes the prevention of future accidents. The importance of prompt reporting, fact gathering, root cause analysis, implementing corrective measures, and conducting follow-ups are covered. Near-miss accidents are also discussed.

BACKHOE SAFETY

BHS-1  
BACKHOE SAFETY AND OPERATIONS (10 minutes)  
VHS ONLY  
The safe operation and maintenance procedures are detailed in addition to pre-start up inspection. This video is targeted toward new as well as experienced operators.

BHS-2  
BACKHOE/LOADER SAFETY (8 minutes)  
VHS ONLY  
The video covers general safety practices and operating rules for backhoe and loader operators, explains basic operator maintenance procedures, and equipment inspection before start-up.

DOG BITES

DB-1  
AVOIDING DOG BITES (16 minutes) 2003  
VHS & DVD  
General tips to help avoid dog bites, how to identify warning signs in dog behavior and what to do when confronted or attacked.

DB-2  
DOG BITE SAFETY (12 minutes) 2006  
DVD ONLY  
If your employees come into regular contact with dogs, they must be able to recognize when they are in danger of an attack. And knowing what actions to take—and not to take—can mean the
difference between their safety and serious injury. This video combines humor with live animal footage to teach employees positive ways to avoid dog bites while on the job. Most dog bites can be avoided by simply reading the situation and understanding dog behavior.

**ELECTRICAL SAFETY**

**ES-1**  
**POWER & SPACE: THE TEN FOOT CIRCLE OF SAFETY (8 minutes)**  
This video produced by GTE is for any construction or municipal employee working on or near lines and poles. It is a good introductory video for any utility or public works employee who may work near or drive equipment adjacent to power lines.

**ES-2**  
**ARC FLASH TRAGEDY (19 minutes) 2009**  
The Mark Standifer Story. In this powerful program, viewers will see the mistakes that Mark made and learn the life-saving lessons from the incident. The importance of understanding all hazards of a job task and taking the necessary precautions to protect yourself from them are stressed throughout the video. Hazards of jewelry and flammable clothing around high voltage; Arc Hazard Analysis; appropriate FR-Rated clothing and PPE.

**ES-3**  
**NFPA 70 E: ELECTRICAL SAFETY-RELATED WORK PRACTICES (25 minutes) 2010**  
Employees are exposed to a wide variety of electrical equipment, systems, and hazards. This video explains the safe electrical work practices required of the latest NFPA 70 E regulation, while showing arc flash explosions, incident reenactments, and FR clothing tests to convince employees of the need to follow these important safety rules. Topics in this video include safe electrical working conditions, energized electrical work permits, approach boundaries, the Incident Energy Level, the Arch Flash Protection Boundary, hazard risk categories, arc-related clothing, and PPE requirements.

**ES-4**  
**GENERAL ELECTRIC PRINCIPLES (17 minutes) 2011**  
Electricity is so common that, at times, we take it for granted. Every year more than 1,000 people are killed and another 30,000 are injured in electrical mishaps. So what is electricity and how does it work? This video gives you a fundamental overview of electrical principles. Some of the material that is covered includes: how is electricity measured and the characteristics of these measurements, review of best work practices designed to keep employees safe, identification of electrical hazards, and how to respond to an electrical injury.

**ES-5**  
**SPILL PREVENTION CONTROL AND COUNTERMEASURE (SPCC) FOR ELECTRIC UTILITIES (25 minutes) 2011**  
The Oil Pollution Prevention regulation promulgated by the EPA under the authority of the Clean Water Act requires oil-handling facilities to take steps to prevent the discharge of oil into surface water. This video provides detailed information about what your SPCC plan should include. Your plan must address layout, discharge prevention measures, drainage control, countermeasures for discharge and discovery, methods for disposal, contact list, and other information. The video also comes with a power point template that can be used to tailor fit your SPCC plan for your facility and for training. Contact the MIRMA office if you want an email copy of this material.
ES-6
DVD ONLY

2012 NFPA 70E: ELECTRICAL SAFETY IN THE WORKPLACE (26 Minutes) 2013

The most recent NFPA 70E standard has many changes and updates as compared to the outdated 2009 edition. In this program, the dual hazards of electrical shock and arc flash are clearly explained and highlighted. This program will also cover how to determine the incident energy level, arc flash protection boundary, when energized work is permitted and when an energized electrical work permit is required. This video will also cover how to properly dress to achieve arc flash protection.

ES-7
DVD ONLY

ELECTRICAL SAFETY FOR QUALIFIED WORKERS (20 Minutes) 2014

Electricity is a powerful force that can cause serious injury and death. When it comes to electrical job tasks, it only takes an instant to turn a momentary mistake into a fatality. This is why qualified electrical workers must understand the hazards presented by exposed energized parts and know how to protect themselves through the use of safe electrical work practices. The video provides a definition of a "qualified" worker, as well as its very important and specific meaning. This video will cover understanding various approach boundaries, shock hazard of electricity, care of voltage-rated gloves, Arc Flash hazard boundary and how to create a zero energy state.

ES-8
DVD ONLY

2015 NFPA 70E: SAFE ELECTRICAL WORK PRACTICES (26 minutes) 2014

This video provides an overview of the 2015 Edition of NFPA 70E which has significant changes to the 2012 standard. One of the leading authorities on electrical safety is the National Fire Protection Association, the NFPA. Their document number 70E is recognized by many regulatory authorities and organizations as the “best practices” for electrical safety. Every year, electrical workers are seriously injured or killed by contacting energized parts or being subjected to an electrical arc flash. To prevent these types of incidents, these workers and the organizations for which they work must understand and follow up-to-date electrical safety-related work practices, maintenance requirements and administrative controls. The video covers proper approach boundaries, how to determine safe work distances, what skill qualified workers must be able to demonstrate, properly selecting arc-rated clothing and selecting proper PPE.

ES-9
DVD ONLY

ELECTRICAL SAFETY FOR EVERYONE (21 Minutes) 2016

Electricity is essential to our everyday lives. With that being said, it’s surprising that many of us know very little about it or the hazards it presents. Many workers don’t understand the dangers of electricity and don’t follow safe work practices when working with or around electricity or electrical equipment. You don’t have to be a qualified electrical worker or electrician to have a need to understand electrical safety. In fact, all workers should know and practice basic electrical safety. This video will cover how electricity works, how resistance relates to the flow of electricity (Ohm’s law), how employees can avoid contacting energized conductors, proper grounding techniques and how GFCI’s can protect workers from electric shock.

ELEVATED PLATFORMS / SCAFFOLDING

EPS-1
DVD ONLY

ELEVATED WORK PLATFORM SAFETY (19 minutes) 2011

Elevated work platforms such as scissor and boom lifts allow us to safely perform various tasks and maintenance operations at height that otherwise may be unreachable. While there are many different styles of lifts designed for various applications and site conditions, they all have one thing in common: the potential for serious injury or death when operated in a careless manner. Electrocutions, falls, crushed body parts, and tip over are just a few examples of incidents that may result from unsafe operation. This video reviews the following important material: how...
leverage, weight capacity, and other factors affect elevated work platform stability, pre-
operational inspection, testing of functions and controls, safe driving procedures, use of harnesses
and lanyards, and avoiding falls from platforms.

**EPS-2 OPERATING AERIAL WORK PLATFORMS SAFELY (17 minutes) 2016**

Aerial platforms come in various sizes and configurations, including scissor lifts, boom lifts and
articulating boom lifts. When a maintenance or construction worker must perform a task at an
elevated working position, these powerful machines are often called on to do the job. This
program discusses some of the common hazards that aerial work platform operators must
consider when using this equipment as well as the safe work practices and operating techniques
that must be followed to ensure everyone’s safety during the use of an aerial work platform. Items
discussed include: What to look for when conducting the pre-operational inspection, how to
properly test the operating controls, what hazards to check for when inspecting the path of travel,
how to drive and raise the lift safely and how to properly dismount from the platform.

**ERGONOMICS**

**ERG-3 EMPLOYEE INVOLVEMENT IN ERGONOMICS (16 minutes)**

Cumulative Trauma Disorders are a growing problem in today's workplace. Ergonomic programs
are a cost effective approach. This program encourages a team effort for health. It discusses
typing hazards, work stations and risk reduction techniques for employees.

**ERG-5 UNDERSTANDING AND CONTROLLING ERGONOMIC RISK FACTORS (19 minutes) 2016**

Ergonomic controls are used in almost all workplaces to prevent Musculoskeletal Disorders
(MSDs), often called cumulative trauma disorders or repetitive stress injuries. Workers often
ignore the signs and symptoms of these disorders until a chronic condition has developed and
they often don’t know the measures they can take to prevent them. The purpose of this program is
to explain what ergonomics and Musculoskeletal Disorders are and the measures your
organization takes to control ergonomic risk factors.

**FIRST AID**

**FA-2 BASIC FIRST AID (13 minutes)**

This video will help your staff respond quickly to work related injuries. The video covers initial
workplace treatments for cuts, burns, strains, sprains, fractures, shock, heat related illness, heart
attack including CPR motivation.

**FA-7 FIRST AID INSTRUCTOR (54 minutes) 2003**

Basic First Aid instruction to cover what to do in the first 5 minutes of care.

**FA-9 FIRST AID – PREPARED TO HELP (17 minutes) 2008**

Being the first one on the scene of a workplace accident can be unnerving. Be sure your
employees know how to help their fellow workers in the case of an injury suffered on the job
with this new program. First aid tips and emergency response principles are covered. It covers:
• Survey the scene  • Send someone to call for emergency response help  • Calm yourself and gain the confidence of the victim  • Assess the victim's condition

FA-10  DVD ONLY  FIRST AID: UNTIL HELP ARRIVES (20 minutes) 2011

Your employees never know when they’ll have to respond to an injured employee, so it is crucial that they know what to do until help arrives. First aid, as well as knowing what to do and what not to do in an emergency, can greatly reduce the extent of a person’s injuries and can even save his or her life. In this video, best selling author / EMT Martin Lesperance shares experience and tips he’s learned from 25 years of working in emergency services and how to respond in a variety of emergency situation. Topics covered include universal precautions, CPR, attending an unconscious person, responding to heart attacks, helping a choking victim, assisting people who are bleeding or in shock, treating fractures, and others.

FIRE SERVICE

FS -15  DVD ONLY  FIRE EXTINGUISHER BASIC TRAINING (13 minutes) 2010

An employee walks in a building and sees a fire starting in the corner. Could they locate the fire extinguisher and would they know how to use it? This video gives the “A,B,C’s” on rules of fire safety and on fire extinguishers. It teaches a better understanding of the fire triangle, how a fire extinguisher works, the different types of fire extinguishers, rules of fighting a fire, and types of fire. A demonstration is provided on how to use the P.A.S.S system when it comes putting out a fire.

FORKLIFT SAFETY

FLS-1  DVD ONLY  FORKLIFTS: OPERATOR SAFETY (20 minutes) 2009

In an effort to avoid an incident and potential injury, this video provides viewers with the basic information they need to know regarding the three areas of forklift safety: how a forklift operates; how to safely lift, carry and place a load; and following the rules of the road. Forklifts vs. automobiles...the differences between. Forklift familiarity, inspection and refueling / recharging. Stability and how it is affected by the load. Lifting, carrying and placing a load. Hazardous conditions and driving safely. Loading trucks, trailers and railcars. Tips for working near pedestrians and other forklifts.

FLS-2  DVD ONLY  FORKLIFT SAFETY LESSONS FOR THE SAFE OPERATOR (15 Minutes) 2016

Each year, nearly 100 workers are killed and another 20,000 seriously injured in forklift-related accidents. Forklift operators play a vital role in preventing these incidents. By using the training they have received, staying alert to the hazards around them, and working safely with pedestrians, loads can moved securely, each and every time. That’s the purpose of this program; to show operators the safe work practices they must follow to avoid injuries and property damage. Items covered include: training/qualification, types and classes of forklifts, pre-operational inspection, mounting and exiting safely, parking, preparing for hazards before traveling, and traveling with a load around pedestrians.
### GENERAL SAFETY

**GS-1**  
**HOUSEKEEPING FOR SAFETY (9 minutes)**  
VHS ONLY  
Good housekeeping issues are reviewed in this video such as an orderly work area prevents slips, trips and falls. It makes it easy to find tools and other work materials. It can increase productivity and the quality of work. Spill procedures for chemicals and hazardous materials are reviewed.

**GS-2**  
**THREE POINTS OF CONTACT (6 minutes) 2004**  
VHS ONLY  
This video is takes a humorous look at the serious results of slip and fall injuries from entering and exiting trucks and equipment. It teaches the basic principal of maintaining three points of contact at all times when climbing in or out and up or down.

**GS-3**  
**HAND SAFETY – YOU CONTROL IT (12 minutes) 2006**  
DVD ONLY  
This program educates your employees on the different types of hand injuries that can occur, how to recognize common hazards found in the workplace and preventative measures to take to protect their hands. Safety is a personal responsibility. A hand injury can occur in a moment, but affect you for a lifetime. This program will motivate your workers to use best practices to prevent hand injuries.

**GS-4**  
**LEADING INDICATORS: THE TENERIFE TRAGEDY (16 Minutes) 2013**  
DVD ONLY  
The worst aviation accident in history occurred in 1977 when two 747 jets collided on the island of Tenerife, killing 583 people. Just like hazardous situations that lead to injuries in the workplace, there were several “leading indicators” or warning signs preceding the collision that warned of impending danger. Included is an interview with Bob Bragg, the only surviving crew member of the Pan Am 747 involved in the Tenerife disaster.

**GS-5**  
**SAFETY DECISION MAKING: OVERCOMING HUMAN NATURE (19 minutes) 2012**  
DVD ONLY  
If you are reading this, you are without a doubt responsible for the safety of your municipalities workers. In order to keep the workforce safe in their jobs we must understand the thought processes that go on in the minds of our workers. The video indicates people often want to do the right thing, to use common sense, and that people believe in general that nobody wants to get hurt. Human nature shows us that people, like electricity, tend to follow the path of least resistance. Safety decision making is influenced by peer pressure, and people willing to give feedback to others in the interest of safety. One important topic the video touches upon includes the idea of how personnel react and perceive possible threats. Some people’s risk tolerance can be distorted by their own inability to see risks, or the blatant disregard for it. As forces for safety, we all must recognize this and act with a safety pre-emptive mind set to avoid injury. This sometimes means upsetting and confronting others to achieve that goal.

**GS-6**  
**I CHOSE TO LOOK THE OTHER WAY (10 Minutes) 2013**  
DVD ONLY  
Based on the popular safety poem of the same name by Don Merrell, this powerful program shows how "speaking up" about unsafe acts can save lives and help to develop a positive safety culture.

**GS-7**  
**SAFETY BOB’S CONSTRUCTION SAFETY ORIENTATION (22 Minutes) 2013**  
DVD ONLY  
With over 25 years of experience as a construction safety professional, Bob Synnett is dedicated to teaching construction workers safe work practices in his training video. Bob shows various
construction hazards and points out that individuals are the only ones responsible for their own safety. Although employers and OSHA can assist in addressing safety issues by requiring all workers to follow PPE at work regulations, it is up to the individual workers to carry out safety precautions and wear safety personal protective equipment. This video will cover types of personal protective equipment (PPE) that should be worn on construction sites, procedures for staying safe when working on ladders or scaffolding, procedures for staying safe when working in and around trenching operations, fall protection equipment and which types are necessary and how to use them properly.

GS-8  
EMERGENCY EVACUATION (13 Minutes) 2013  
DVD ONLY  
No matter what the emergency, from a burning building to a natural disaster; commitment for the safety and health of every employee should be the highest priority. This video will review emergency evacuation preparedness programs and why they should be updated regularly. These basic programs should include topics such as: floor warden, emergency action procedures and communications. The video will also describe the three different “zones” in an emergency: red or hot zone, yellow zone and the green or cold zone.

GS-9  
GOOD HOUSEKEEPING: EVERYONE’S RESPONSIBILITY (17 Minutes) 2013  
DVD ONLY  
Good housekeeping is everyone’s responsibility. This video will cover how to maintain a work area, how to properly handle flammable liquids, and why offices should be kept clean. The video will also cover which work practices will help employees maximize productivity and how to prevent trip hazards in the workplace.

GS-10  
MAINTAINING YOUR SAFETY (20 Minutes) 2014  
DVD ONLY  
Maintenance workers maintain all aspects of operations and equipment. They are such an important part of the process that they feel pressure to get all repairs done fast! In this program, maintenance workers learn how to overcome pressure and redouble their efforts to always follow safe work procedures. Also featured are reenactments of common maintenance incidents, testimonials and examples of safe work practices.

GS-11  
JOB SAFETY ANALYSIS, SAFETY AWARENESS AND YOU (16 Minutes) 2014  
DVD ONLY  
There are a variety of methods used to protect workers from workplace hazards, but all workplace injury prevention methods require an understanding and awareness of the workplace hazards to which workers may be exposed. In other words, the company and the worker must be aware of a workplace hazard before that workplace hazard can be controlled. A Job Safety Analysis or JSA, is a valuable risk assessment tool used to help accomplish this goal. This safety training video discusses the important roles played by both management and employees in recognizing and controlling workplace hazards and how this shared duty of hazard recognition and safety awareness aids in workplace injury prevention. This video will also cover the following: Define Job Safety Analysis, identify when a Job Safety Analysis should be performed, what information is needed to complete a Job Safety Analysis, define safety awareness, and how hazard recognition will help employees avoid injuries.

GS-12  
A SAFETY CAROL (23 Minutes) 2014  
DVD ONLY  
Ernest “Scrooge” Hungerfield and Jacob Marley thought following safety procedures was a waste of their precious time and they bullied or teased anyone they perceived as "wasting time for safety." One day, while performing a task in his usual unsafe manner, Marley is killed. The ghost of Marley is doomed to watch the ripple effects of his unsafe actions on himself and his co-
workers; and explains to Scrooge that he too will be doomed to the same fate if he does not change his ways and embrace safety.

Marley's ghost tells Scrooge he will be visited by the Spirits of Safety Past, Safety Present and Safety Future and he must learn valuable safety lessons from them to avoid the same fate. Upon his return to the real world, Scrooge vows to become a positive safety influence on others and that safety can be contagious. He learns that when safe choices are made in the present, the future is a much better place.

GS-13
AN INTRODUCTION TO WORKPLACE SAFETY (12 Minutes) 2014
It doesn't matter if you're a brand new worker or one with many years of experience; we all play a critical role in maintaining a safe and healthy workplace. This program provides an overview of the roles and responsibilities of both the company and the employee in regard to safety and how these elements fit together to form a comprehensive safety program. This video will also cover how workplace hazards are identified, controlled and how a safety culture works to keep all employees safe.

GS-14
CLOSE CALLS AND NEAR MISSES (17 Minutes) 2014
This video will cover the importance of reporting all close calls and near miss incidents so that proper action can be taken to improve work conditions and prevent injuries. It will also cover what actions can be taken in response to investigation of a close call or near miss.

GS-15
I CHOSE TO LOOK THE OTHER WAY: THREE STORIES OF WORKPLACE SAFETY (13 minutes) 2014
In this dramatic program, viewers will witness examples of three common scenarios where workers see something...but don't say something. Your employees will learn that the root cause of each incident was a reluctance to speak up. They will be convinced that speaking up about unsafe acts is critical in the prevention of workplace injuries.

GS-16
PROMISES, PROMISES (13 Minutes) 2016
In this video, viewers will see how the choices we make about our personal safety, both on and off the job, impact our ability to keep promises that we have made to loved-ones. Employees will always remember the program’s universal theme – seemingly minor safety decisions can have huge unintended consequences.

GS-17
EXPEDITION TO SAFETY (27 Minutes) 2016
This program features Jim Elzinga, a world renowned high-altitude mountain climber sharing his firsthand stories of both triumph and tragedy on Mt. Everest. Along the way, he has learned many lessons about what it takes to stay alive in hazardous environments. Now a safety culture consultant and leadership facilitator, Jim explains in spellbinding detail how the requirements of building a safety culture to survive summiting Mt. Everest are no different than what is needed to build a safety culture in the workplace. Viewers will learn valuable safety lessons about the four keys to safety culture: Create It. Embrace It. Believe It. Live It. Items discussed in this video include; why all team members must contribute to achieve success, how success is defined by returning everyone home safely, how human nature impacts risk-taking, how goal-focused leadership can dismiss the wellbeing of the individual, how individuals can embrace their role in helping to reach the overall goal and how we can use risk assessment to stay safe.
RESPONSIBILITY: STAY IN CONTROL OF YOUR SAFETY (10 Minutes) 2016

People don’t come to work planning on being injured or even working unsafely. Yet every day, hundreds of people are injured and killed at work, often because they gave up control of their safety. This safety video shows how we need to prevent outside forces like time, emotions, peer pressure or distractions from taking control of our safety.

HAND & POWER TOOLS

HPT-1 RULES FOR TOOL SAFETY (12 minutes)

Six basic, but very important rules when working with tools are reviewed. Choose the right tool for the job, inspect the tool prior and after use, use tools correctly, wear appropriate personnel protective equipment, keep the work area safe and carry & store tools properly.

HPT-2 HAND TOOL SAFETY IN THE WORKPLACE (29 minutes) 2004

This video which includes over 100 common uses and abuses of hand tools by tool users. Viewers are alerted to hand tool safety practices that prevent accidents.

HPT-3 WORKING SAFELY WITH HAND AND POWER TOOLS (17 minutes) 2008

In this program we are shown the basic safety rules that will greatly reduce the risk on injury during hand and power tool use. Stressed is the importance of having a good safety attitude and exercising good judgment while using tools. Equipment inspection and personal protective equipment are other featured topics.

HPT-4 COMPRESSED AIR SAFETY (17 minutes) 2010

Compressed air is second only to electricity as the most popular source of energy in today’s workplace. It powers a wide variety of tools and equipment. Because electricity isn’t associated with compressed air use, most people don’t recognize the hazards. This video teaches a better understanding of the hazards associated with compressed air and controls to implement to prevent an injury.

HEARING CONSERVATION

HC-1 HEARING CONSERVATION – YOU DECIDE WHAT TO HEAR (12 minutes) 2006

In this program your employees will learn how their body hears sound and the affects excessive noise has on them. It will teach them techniques for identifying hazardous noise and educate them on best practices and procedures to reduce their exposure. Hearing Conservation - You Decide What to Hear will motivate your workers to recognize and respect the hazards and instill that they are responsible for taking proper measures to protect their hearing. Noise induced hearing loss is 100% preventable.

HC-2 HEARING CONSERVATION TRAINING FOR EMPLOYEES (18 minutes) 2010

Because hearing loss can be gradual, we often don’t recognize it’s happening until it’s too late. This is why we must make sound decisions when it comes to protecting our hearing. You will
learn about how noise damages hearing, noise reduction ratings, ear plugs and ear muffs, symptoms of hearing loss, and off-job noise exposure.

**HC-3 HEARING CONSERVATION & YOU (20 Minutes) 2016**

Follow along as Steve, Jerry and a group of co-workers receive their annual training on hearing conservation. Steve doesn’t take the issue of hearing loss seriously and continually disregards the need for hearing protection at home and at work. As time passes, Steve develops the symptoms of hearing loss due to his poor choices regarding hearing protection. Watching the example of Steve’s poor attitude and subsequent hearing loss will convince your employees to protect their hearing at home and at work. Items discussed in this video include: how noise can damage our hearing, how to fit earplugs/earmuffs and the importance of wearing them when harmful noise is present. Learn how a medical surveillance program is used to recognize and help prevent employee hearing loss, as well as the signs and symptoms of hearing loss.

**HEAT STRESS**

**HS-2 HEAT STRESS PREVENTION (11 minutes) 2006**

Employees will be shown what heat stress is, what the symptoms are, how to prevent it, and what to do about it if it happens to them or someone else. The training will reveal in layman's terms how the body handles heat and why the body can't handle high heat under certain circumstances. Health issues are covered such as dizziness & headaches as well as safety issues like sweaty, slippery hands and decreased mental alertness.

**HS-3 OVEREXERTION (14 minutes) 2006**

In this effective and motivational program, Overexertion will teach your employees how the body functions, risk factors associated with overexertion type injuries, and preventive measures they can utilize to reduce their exposure and prevent injuries. The program teaches the impact their posture can have on their body and the cumulative affect of improper lifting techniques. The visual graphics and comprehensive information will educate and motivate your employees to make the proper decisions and lifestyle adjustments to ensure their health and safety.

**JAILS**

**JAIL-1 SUICIDE PREVENTION IN JAILS (56 Minutes) 2014**

This is an annotation not a video. This annotation covers issues surrounding the prevention of inmate suicide in jails. These slides will enable readers to: understand the problem of jail suicide, rates of suicide in certain groups, the decrease in jail suicide rates, what makes jails risky environments, and challenges of prevention; describe suicide risk factors, warning signs, and suicide myths that increase ones risk; and discuss intervention best practices—the qualities of a suicide prevention program (a written suicide prevention policy and a culture of prevention among others), the process of suicide prevention, the use of wise correctional techniques, emergency response, and practice. Lessons learned from two case studies and two legal cases are also covered.
**LADDERS / STAIRWAYS**

**LS-1**
STAIRWAYS AND LADDERS (24 minutes) 2011
DVD ONLY

Don’t be deceived. Stairways and ladders may not appear to be as dangerous as scaffolding, yet every year, over 34,000 workplace accidents involve stairways and ladders. Before your employees step on that stairway or ladder, they must review the crucial safety precautions in this video. They must understand why these stairways and ladder accidents occur and what they can do to prevent them. Safe work practices that the video discusses include identifying and preventing stairways hazards, proper ladder selection, safe climbing of a fixed ladder, proper use, and real-life situations.

**LS-2**
LADDER SAFETY (17 minutes) 2014
DVD ONLY

Ladders are a pretty common and useful fixture both on and off the job. Most of us have probably used one or more types of ladders in our lifetime and you may feel familiar with and comfortable working with ladders. But there’s more to working safely with ladders than just setting one up and climbing it. This video will cover selecting the right ladder for the job, how to inspect a ladder, ascending and descending ladders using 3 points of contact.

**LANDSCAPE EQUIPMENT MAINTENANCE AND OPERATION**

**LEMO-1**
SAFETY PROCEDURES FOR LAWN MOWER OPERATORS (22 minutes) 2009
DVD ONLY

This video shows viewers the safety issues and hazards with walk behind, riders and reel mowers and is divided into four sections that cover: General issues, PPE, Walk behind mowers, and Rotary ride-on & Reel mowers.

**LEMO-2**
CHAINSAW SAFETY (23 minutes) 2009
DVD ONLY

This video shows viewers the safety issues and hazards with chainsaws. It covers PPE, saw features and maintenance, safe operations, safety features, preventative maintenance, and proper felling, climbing & bucking.

**LEMO-3**
LANDSCAPE POWER TOOL SAFETY (25 minutes) 2009
DVD ONLY

How do you avoid a chainsaw kick back? What actions should be taken when working around the public? Where should you stand when working on a hill? These questions and others will be covered. This program shows issues with string trimmers, chainsaws, blowers and pole saws. It also demonstrates what PPE should be worn; hard hats, face protection, chainsaw chaps and etc.

**LEMO-4**
GROUNDS KEEPING: BE A PRO (17 minutes) 2011
DVD ONLY

All workers responsible for grounds keeping need this training to prevent injury and illness. Employees will learn much they need to know about how to work safely with potentially dangerous tools and chemicals. Safety practices discussed in the video include wearing appropriate personal protective equipment, safe operation of tractors, riding, push lawn mowers, and others.
# LEGAL AND LIABILITY

<table>
<thead>
<tr>
<th>LL-1</th>
<th>MANAGING CONTRACT LIABILITY (107 minutes)</th>
</tr>
</thead>
<tbody>
<tr>
<td>VHS- ONLY</td>
<td>This video reviews the liability by general contractors when they hire third parties to perform work on one of their job sites. Who has the responsibilities to protect employees at multi-employer work sites. How a safety program can work in protecting employees from injuries and general contractors from liability. The video discusses various owner controls, focused inspections, and reviewed statistics when an accident does occur.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>LL-2</th>
<th>LEAD BASED PAINT LIABILITY AND ABATEMENT (120 minutes)</th>
</tr>
</thead>
<tbody>
<tr>
<td>VHS ONLY</td>
<td>A basic understanding of regulations already in place (OSHA, EPA, HUD) and pending regulations regarding lead based paints. The video discusses what is affected, who is affected, what is covered, what is not covered, and record keeping requirements, and reviews examples of illegal acts.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>LL-3</th>
<th>EMPLOYMENT PRACTICES: SMART RISK MANAGEMENT (104 minutes)</th>
</tr>
</thead>
<tbody>
<tr>
<td>VHS ONLY</td>
<td>This video reviews current trends in employment loss and litigation. The trends covered include discrimination claims, workers’ compensation claims, workplace violence claims, increased mental disabilities claims. The video will discuss why employers are unprepared, why employees are more likely to file a lawsuit, why juries likely to side with the employee, and why employees fail to report workplace wrongdoing to the employers. The program reviews the importance of implementing consistent policies and have in place effective reporting mechanisms.</td>
</tr>
</tbody>
</table>

# LIFEGUARDING

<table>
<thead>
<tr>
<th>LG-1</th>
<th>VIGILANCE AWARENESS TRAINING – AQUATIC SAFETY FOR LIFEGUARDS (17 Minutes) 2014</th>
</tr>
</thead>
<tbody>
<tr>
<td>DVD ONLY</td>
<td>A must watch video. Enhance your lifeguard's ability to prevent a drowning with this video about vigilance awareness training. Key components of this video include concepts in lifeguard training. This video will also cover site specific training on each zone of protection, utilization of zone validation systems and operational manikin drops with live active drills.</td>
</tr>
</tbody>
</table>
LG-2 DISAPPEARING DUMMIES: WHY LIFEGUARDS CAN’T SEE (11 Minutes) 2014

This video demonstrates and illustrates just how difficult it is to see under the surface of the water even under perfect swimming pool conditions. Find out why other swimmers in the pool often find victims on the bottom before professional lifeguards on duty do. This video will also show the latest technologies that can help lifeguards detect what they cannot see.

LIFTING

LIFT-1 MANUAL LIFTING AND HANDLING (9 minutes)

Presents the basics of proper materials handling, how-to's for training workers and an analysis of the lifting process.

LIFT-2 SYSTEMS LIFTING 2000 (34 minutes)

Includes the entire back system, vertebrae, discs, ligaments & muscles; body mechanics, engineering; causes of back pain-strains, sprains, herniated disc, sciatica; lifting techniques-load against body; pressure & safe lifting zones; prevention of back injuries-diet, exercise, sitting, standing, sleeping poorly, workstation ergonomics; harm from smoking, poor posture, un-safe lifting techniques, lack of exercise, age.

LIFT-3 POWER LIFT; LIFTING TRAINING THAT WORKS (19 minutes) 2009

Most of us have been trained to lift objects with the traditional bend your knees and keep your back straight technique, but it doesn't work. This method forces us to overuse our knees and legs and our backs still end up bearing the brunt of the load. Dr. Michael Schaefer has recognized the flaws of the conventional lifting technique and developed a safe, easy and stronger lifting position...The PowerLift concept: Tipping Load, Tripod Lift, Golfer's Bend, Lean-Bar Lifting techniques and bridging

LIFT-4 STRAINS AND SPRAINS – A PUBLIC CONCERN (20 minutes) 2011

The video goes back to the basics of how to prevent a stain and sprain injury. It shows multiple job sites where an employee injured themselves while working. Stain and sprain injuries occur from various hazards in the job site including: repetitive work, poor housekeeping, pulling and pushing heavy loads, lifting, and extreme force. Many safe work practices are reviewed to prevent strains and sprain injuries that include: good housekeeping practices, proper lifting techniques, material handling, and other safety tips.

LIFT-5 MOVE IT SAFELY: AVOIDING INJURIES WHILE MOVING MATERIALS (20 Minutes) 2014

Two of the main causes of injuries to material handling workers are attempting to show off to their co-workers and not wanting to take time to get the proper equipment or ask for help. This leads to workers struggling to lift and carry materials which are too heavy to be moved safely. In order to move objects safely, employees must be well trained in safe material handling techniques while also maintaining the proper attitude and state of mind to use their training each time they lift or move an object. This video will show how to prepare for lifting and moving a load, how to manually lift and move an object without injury and how to avoid injuries when working near powered material handling equipment.
OFFICE SAFETY

OS-4 OFFICE SAFETY: IT’S NOT MAGIC? (14 minutes) 2007

The program utilizes the talents of nationally renowned magician Steve Faris to capture the audience’s attention and emphasize the fact that safety is a personal responsibility and a safe, healthy, office environment does not happen by magic. This program addresses some of the most common hazards found in today’s offices and is designed to motivate employees to use their best safety work practices to ensure their safety. Magic will not make a trip hazard or spilled substance disappear, but your employees can. Topics covered include: Slips, Trips and Falls; Proper Lifting Techniques; Ergonomic Related Risk Factors; Good Housekeeping; Importance of Proper Posture; Hazard Communication; Electrical Safety and Fire Safety.

OS-5 OFFICE INJURY PREVENTION (18 minutes) 2010

In the fast-paced and sometimes high-stress environment of a busy office, workers sometimes forget about their most important workplace responsibility: their safety. They overlook safety issues because they just don’t believe an office has any hazards; yet, nearly 40,000 office workers suffer disabling injuries each year. This program stresses the importance of office safety and how a good safety attitude and using good judgment are the real keys to injury prevention. Many common office safety issues are discussed, including good housekeeping, controlling slip, trip and fall hazards, using proper lifting techniques, avoiding repetitive strain injuries, preventing eye strains, office equipment hazards, and others.

PERSONAL PROTECTIVE EQUIPMENT

PPE-1 PERSONAL PROTECTIVE EQUIPMENT - THE RIGHT CHOICE (16 minutes) 2004

This video gives an explanation common PPE and their appropriate uses. It covers head, eye, hearing, hand and foot protection.

PPE-2 PPE: REALITY IN THE PUBLIC SECTOR (19 minutes) 2008

People have different reasons for not wanting to wear their PPE and this program takes a first hand look at the devastating effects of not taking this responsibility seriously. Using real-life testimony from a worker injured on the job, PPE: Reality In The Public Sector makes it clear that wearing the right equipment can reduce or eliminate injury. It covers: • Wearing the right PPE for the job • The importance of PPE • Employer's and employee's responsibility • Care and maintenance • Different types of PPE.

PPE-3 MORE HIGH IMPACT – PPE (18 minutes) 2009

This dynamic video shows viewers that a commitment to wearing the required PPE is the key to maintaining an injury-free workplace or even saving ones life. Filled with re-creations of actual accidents from OSHA files, this film has proven to be a highly effective training tool through its scared-straight, graphic nature. Six accidents involving PPE-related mishaps: After removing hardhat, instructor struck and killed by falling flange, Employee passing through shipping area is hit in eye by nail. & Worker without goggles splashed in eyes by chemicals.
**PPE-4**
**PPE: FROM HEAD TO TOE (16 minutes) 2010**

Failing to plan is planning to fail – and that’s exactly what you’re doing when you choose not to wear the proper personal protective equipment for your job. That’s the message of this program that provides an easy-to-understand overview of the variety of PPE available to help make the job task we undertake safe. Included are several reenactments of workplace incidents in which the proper use of PPE prevents severe or lift-threatening injuries.

**PPE-5**
**HIGH IMPACT: PERSONAL PROTECTIVE EQUIPMENT (19 minutes) 2011**

Personal protective equipment is the last line of defense between us and workplace hazards that cannot be controlled through engineering or other means. There are many excuses that employees offer for failing to use their PPE, but the accidents that result from not wearing protective equipment makes one thing perfectly clear: each time they make a conscious decision not to use PPE, they are neglecting personal safety and setting themselves up for an accident. This video has several reenactments that will show the tragic consequences for not wearing proper PPE. Use of eye protection, hard hats, hand protection, respirators, special protective clothing, hearing protection, and fall protection are all topics covered in this video.

**PPE-6**
**DAVID’S BEEN HURT PPE: WEAR IT FOR YOU (12 Minutes) 2013**

A true story of surviving a violent explosion during a routine maintenance procedure. Because of the Personal Protective Equipment he was wearing, he is here today to share his moving account. This story illustrates how an injury can affect family, friends and co-workers. It’s a message your employees won’t soon forget!

**POLICE LIABILITY**

**PL-51**
**IN THE LINE OF DUTY – COATES’ KILLER INTERVIEW (35 minutes)**

Volume II, Program 4. In Volume I, Program 4 we reviewed an incident in which a traffic stop turned tragic as a South Carolina Trooper was shot and killed by a motorist. This program is an interview in the Allendale Correctional Institution at Fairfax, South Carolina with the convicted killer, who is serving a life sentence for the crime. The objectives for this lesson include; the need for having back-up on stops where a subject and/or vehicle may need to be searched, shows the importance of stopping at other officer’s traffic stops no matter how low-risk or under control they may appear to be and discusses the benefits of making your communications personnel aware of your location when making all stops.

**PL-52**
**IN THE LINE OF DUTY - GUN SAFETY/311 NON-EMERGENCY SYSTEM (29 minutes)**

Volume II, Program 5. In this issue two different topics are covered. The first is a gun safety issue, in which a young police office climbs a ladder to retrieve a subject’s shotgun which was left on a porch overhang. The subject was in the custody of other officers at the time of this incident. During the suspect’s arrest, his shotgun was left hanging on the edge of the overhang. While securing the shotgun, it discharges, causing severe damage to the officer’s hand. Using close-ups and slow motion special editing techniques, this nearly fatal weapon recovery incident is reviewed in detail. The second topic reviewed is a Baltimore Police Department’s experiment in conjunction with the Justice Department and AT&T. In this project, the public is asked to begin dialing 3-1-1 instead of 9-1-1 when calls are for non-life threatening situations. The program is reviewed and preliminary results are discussed.
**PL-53**  
**IN THE LINE OF DUTY - HALLOWEEN RIOT (33 minutes)**  
Volume II, Program 6. This program takes place in Carbondale, Illinois, at Southern Illinois University (SIU). An annual Halloween celebration turns violent and dangerous when students assembled to party and celebrate Halloween are told that the party will be over at 10:00 pm. When the students learned of this plan, an intense 24 minute riot broke out.

Lessons learned in this program include demonstrating how quickly a crowd can turn into a riot. Emphasizes the need for pre-planning for large gatherings, focuses on what resources may be available to your department and shows that even the best of plans can backfire. It also demonstrates how video coverage of such events can be useful afterward for training purposes.

**PL-54**  
**IN THE LINE OF DUTY - PURSUIT NABS NAKED COWBOY (30 minutes)**  
Volume II, Program 7. The pursuit takes place in Kootenai County, Idaho. A pick-up, with an inebriated, unclothed male subject is pulled over. Upon approaching the vehicle, the Deputy notices a .22 caliber rifle, banana magazine clips and an open container of liquor. After repeatedly asking the subject to turn off the ignition and hand over the keys to the truck, the subject suddenly drives off with the Deputy and State Troopers in pursuit.

Lessons reviewed in this program include discussing pursuits and factors that should be considered. It illustrates the use of canines at the conclusion of a pursuit and demonstrates the importance of using only one officer to give verbal commands to a suspect in a vehicle.

**PL-55**  
**IN THE LINE OF DUTY - VEST SAVES DEPUTY’S LIFE (34 minutes)**  
Volume II, Program 8 is one every MIRMA Police Officer should review. A Georgia Sheriff’s Department Deputy, pulls over a vehicle for speeding 88 mile per hour in a 55 mile per hour speed zone, at 3:00 a.m. on a January morning. Just as the officer informs the driver of the reason for the stop, the driver, a 15-year-old male, without a license, pulls a 9 mm Glock and fires two rounds at the deputy’s chest almost point blank. Both rounds struck the deputy just above the heart, but because he was wearing his protective body armor, he survived this shooting. Dash-mounted video footage and an interview with the deputy following the incident should get each officer’s attention to always wear their vests.

**PL-56**  
**IN THE LINE OF DUTY - OFFICER KILLED/RAILROAD SAFETY (29 minutes)**  
Volume II, Program 9 details an incident in which a Detective is hit and killed by a train during an evidence search along a set of railroad tracks in Brea, California. The officer died instantly when he apparently either did not see the train coming or thought it was on a second parallel set of tracks. The incident is eerily brought home when the Chief of the department is warned by pager of an oncoming train, which neither he nor the cameraman would have heard or felt otherwise. This is a powerful, live documentation of the inherent dangers surrounding rail yard searches.

**PL-57**  
**IN THE LINE OF DUTY - GANG VIOLENCE STOPPED ALords of CHAOS (30 minutes)**  
Volume II, Program 10 is a presentation which comes from Lee County, Florida, where a high school band director is brutally murdered by a group of students. The alleged killers, were members of a self-proclaimed cult, or militia, called the ALords of Chaos@. As the name implies, members were bent on creating chaos. They were anti-black and anti-gay. In a period of only three weeks, the group advanced from performing malicious mischief to arson and car jacking, and finally to murder. If not for a tip from a friend, one of the members, that the group had plotted to rob a fast food restaurant and
with the money from that heist, plot an attack on Walt Disney World, their reign of terror may have continued.

IN THE LINE OF DUTY - TROOPER KNIFE FIGHT (30 minutes)

Volume II, Program 11, in this issue a Georgia State Patrol officer decides to stop at a rest area at the conclusion of his shift. In the past he had made felony drug arrests at this location. When he arrives, he notices a parked pick-up with a male subject draped across the front seat. The officer taps on the window and awakens the individual who is initially cooperative. But after a series of questions and responses the trooper becomes suspicious of the story he is being told. The trooper asks for a voluntary consent to search the vehicle, and again the suspect is initially cooperative, but after a couple of seconds, the subject turns around and lunges at the trooper with a three inch knife. We then witness a several minute struggle for the knife, and the trooper firing his service revolver once, hitting the subject in the lower abdomen, but still continuing to fight with the trooper.

IN THE LINE OF DUTY - ST. PETERSBURG RIOTS/CROWD CONTROL (39 minutes)

Volume II, Program 12 is one of the best examples of Learning the Easy Way. By reviewing this program, you can reduce the potential for making mistakes that another department has already made. In this edition the St. Petersburg Police Department explains their response to two civil disturbances which occurred after a traffic stop, in which a young an is shot and killed by an officer. The overwhelming emphasis for this program is that the department made numerous mistakes, they are not prepared for such an event, they lacked training, sufficient equipment, communication devices and a plan of operation. Since this incident the department has implemented a Mobile Field Force (MMF) concept training system and is now required training for everyone in the department. It’s purpose is to provide rapid, organized and disciplined response to civil disorder and other tactical situations. Dozens of recommendations were made related to the handling of this event and any departments can learn from this program.

IN THE LINE OF DUTY - CHILD ABDUCTION (32 minutes)

Volume III, Program 1 officers receive a 911 call that a child has been abducted. Upon arrival they found a disturbed male adult who has taken the child out into the middle of a swampy bayou and would not respond to the officers. Several attempts are made to rescue the child from the abductor and at one point he holds the child under water. The suspect is shot in the shoulder, sprayed with OC spray and yet he continues to struggle with the officers. Finally, through sheer physical force and determination the officers are able to free the child from the man’s grasp.

IN THE LINE OF DUTY - LAW ENFORCEMENT AND THE NEWS MEDIA (36 minutes)

Volume III, Program 2. This edition outlines the relationship between law enforcement and the media, and specifically details how to deal with the media in major and routine incidents alike. It is important for every member of every rank to understand the media, it’s power and how to deal with it effectively. In an instant, any community can host a crisis and become the focus of not only local, but national and even international attention. A hungry, competitive and sometimes frenzied media can put you, your department and the resources to the test. When the reporters come and start taking pictures and asking questions you’d better be ready, because the pressure will be on, from the rawest rookie to the most seasoned veteran.

POLICE PURSUIT: THE OTHER DEADLY FORCE (16 minutes)

This video produced by the Michigan Municipal Risk Management Authority is an excellent program for each and every officer to review as part of your on-going training related to pursuits. Tragic real life situations are reviewed, including a pursuit which affects both a municipal police chief and a state
highway patrol officer. An Oklahoma municipal police chief recants this tragic situation which took the lives of his wife and daughter and seriously injured his other daughter. In another situation a police department involved in a high speed pursuit is held liable for the death of an innocent traffic victim, resulting in a multi-million dollar judgment against the city.

**PL-63**
*IN THE LINE OF DUTY-PERPENDICULAR SHOOT (42 minutes)*
Volume III, Program 3 in this issue sheriff’s deputies in Buncombe County, North Carolina had been on directed patrol in an area of heavy drug use and d.u.i. activity. A suspicious vehicle was noted with numerous adults watching the officers every move. Officers felt enough suspicion to justify following the vehicle when it left the parking lot. After stopping the car and questioning the female driver, the passenger in the backseat (behind the driver) was asked to step out of the car for questioning as well. While getting out of the vehicle, officers notice a gun. Despite loud and clear verbal commands, the subject would not drop the gun. Shots were fired, killing the subject. The tape then reviews each step that leads up to the shooting. Discussions are made on what the officers could do to prevent this shooting and not to take traffic stops as a routine.

**PL-64**
*IN THE LINE OF DUTY-DOMESTIC VIOLENCE (58 minutes)*
Volume III, Program 4 this program was produced in cooperation with Anne O’Dell, retired Detective Sergeant, San Diego Police Department. She coordinated San Diego’s nationally acclaimed Domestic Violence (DV) Investigations Unit. She is a consultant, lecturer and author on the subject of DV. San Diego approaches DV cases by focusing on the abuser. The rationale: The victim can’t stop DV; only the abuser can. The video goes into detail on how to recognize an offensive or a defensive injury, how to collect evidence, how to investigate DV properly, and many other areas where officers can improve. We are learning that early intervention saves lives and until we get rid of the officer’s mindset that it’s just another domestic, we will continue to go back to the same address.

**PL-65**
*IN THE LINE OF DUTY-HOOD RIVER MULTI-SPEED CHASE (30 minutes)*
Volume III, Program 5 this program combines many elements law enforcement officers can face in a vehicle pursuit. During the course of this incident, Oregon sheriff’s deputies and police officers were faced with a high-speed pursuit, a low-speed pursuit, and a chase that included everything from smooth, paved roads to winding mountainous dirt roads. It also encompasses a number of vital lessons and officer safety elements which will be of interest to all agencies. This incident also involved dual agencies, it is an incident that can be studies for determining your own priorities and strategies regarding pursuits into other jurisdictions.

**PL-66**
*IN THE LINE OF DUTY - SAN FRANCISCO FIREFIGHT (45 minutes)*
A wild firefight in downtown San Francisco results in the death of a veteran police officer. A gunman with a veritable arsenal of weaponry and ammunition opens fire in a posh San Francisco neighborhood. The resulting chaos is documented visually and with in-depth interviews with responding officers.

**PL-67**
*IN THE LINE OF DUTY - CONTACT & COVER (38 minutes)*
The San Diego P.D.’s Contact and Cover program, developed after two of its officers were shot and killed, is analyzed. Also, the Collinsville (IL) P.D. provides dramatic video and analysis of an incident in which contact and cover was not used to its fullest, leading to near disaster. Contact and cover defines the roles of officers during any interaction with suspects. Non-verbal communication using hand signals is a key element of this excellent tactical strategy. Complete training overview.
IN THE LINE OF DUTY - CORPUS CHRISTI KNIFE ASSAULT (35 minutes)

This program evaluates two incidents in which officers were assaulted; one by a knife-wielding inmate; the other by an inebriated subject during a DUI/Sobriety test. Both incidents were captured on video by the Corpus Christi (TX) P.D., and are absolute proof positive that officers need to be constantly aware and in communication with one another during all kinds of procedures.

IN THE LINE OF DUTY - TRAFFIC SAFETY/PASSENGER-SIDE APPROACH (29 minutes)

Several incidents in which officers have either been injured or killed during traffic stops are examined. An Idaho deputy is nearly struck and killed by an inebriated teenage motorist and analyzes his own response. Also, Jim Crotty of Strategies for Officer Survival’ demonstrates excellent passenger-side approaches while making traffic stops.

IN THE LINE OF DUTY - HIGH-RISK STOP/FELONY VEHICLE STOP (35 minutes)

This program is two important parts: 1) a follow-up to V-3, P-9 in which Bonner County (ID) Deputy John Lunde is hit by a fleeing motorist. The resulting high-risk stop is analyzed by Lunde and his fellow back-up officers and 2) Jim Crotty of Strategies for Officer Survival, Inc. provides a demonstration of a ‘textbook’ felony vehicle stop with the cooperation of the Brunswick, GA P.D. In ‘Back-Up’ the L.A.S.O. has success lowering convenience store hold-ups with robot manne-quals complete with ‘in-head’ video cameras.

IN THE LINE OF DUTY - CANINE SAVES FELLOW OFFICER/CANINE TRAINING FOR STREET COPS (35 minutes)

In an extraordinary incident, a police K-9 saves the life of another K-9 which had been sent into a waterway to attempt to apprehend an armed robbery suspect. The suspect started drowning the first dog until the other animal swims to his partner’s rescue. Also, vital tips for any street patrol officer who may ever have dealings with K-9’s. This important information is provided by K-9 expert with the St. Louis Metropolitan Police Department. Largo, Florida Police demonstrate their extraordinary new intranet domestic violence program which has dramatically increased.

IN THE LINE OF DUTY - IDAHO TROOPER SHOT (VEST SAVES LIFE) NEW TRAINING HANDCUFFS (40 minutes)

Idaho State Trooper Gonzales is shot at point blank range yet still assists in the arrest of the offender. Analysis and interviews with Gonzales and other troopers involved plus experts from the I.S.P.’s own video training documentation. Also includes information on handcuffing techniques.

IN THE LINE OF DUTY - HOMICIDE SUSPECT COMMITS SUICIDE/SHORT STROKING PREVENTION (35 minutes)

A homicide suspect driving through a rural Texas community is stopped by D.P.S. officers. He exits his vehicle-then returns to it and pulls out a gun. Despite verbal commands and facing drawn service weapons, the subject points the gun to his head and pulls the trigger. Officers involved discuss and analyze their response to this incident, their tactics in making the original stop, and the lessons learned.
PL-75
VHS ONLY

IN THE LINE OF DUTY - ALBUQUERQUE HOSTAGE-SNIPER INCIDENT
A bank robbery suspect who had taken a female employee hostage is mortally wounded by a member of the Albuquerque S.W.A.T. team. This is only training documentation of the incident and includes complete information and analysis by the actual officer responsible for stopping the subject. In "Back-Up" is an excellent demonstration.

PL-76
VHS ONLY

IN THE LINE OF DUTY - CHILD ABUSE
Critical information for street cops in the recognition of child abuse as first responders. The program features nationally known expert pediatrician Dr. Armand Brodeur, and in-depth information is provided by the Minneapolis (MN) Police Department’s "Child Abuse Unit." The "Back-Up" segment provides an area of control warning in which it’s possible for a perp to disarm an officer. Also, a look at another method the bad guys use to get out of handcuffs.

PL-77
VHS ONLY

IN THE LINE OF DUTY - MASS TRAFFIC ACCIDENTS DRUG CONCEALMENT SPOTS
Two of the largest mass traffic accidents in recent U.S. history are analyzed by the Missouri Highway Patrol and the Virginia State Police. Vital first-time training for dealing with large-scale traffic accidents and multiple injury accidents. "Lessons learned" in traffic reporting, accident report writing, and incident command.

PL-78
VHS ONLY

IN THE LINE OF DUTY - LARGE VEHICLE STOP TURNS NEARLY VIOLENT
A Sheriff’s deputy makes a nighttime stop of a speeding truck driver who becomes extremely belligerent, even though he’d been stopped a short time earlier for the same infraction. In-depth interview with the contact officer. Additionally, complete analysis and review of this very tense situation, its outcome, and many lessons learned. Also, an excellent tutorial by Jim Crotty of "Strategies for Officer Survival" on the unique situations officers face stopping large vehicles.

PL-79
VHS ONLY

IN THE LINE OF DUTY - CRIME SCENE PRESERVATION FOR STREET COPS (38 minutes)
This program promises to be an invaluable edition for police officer training. It features Dee Heil, formerly a lead homicide investigator for the Illinois State Police. Mr. Heil brings his many years of expertise to bear graphically showing street officers the critical first steps needed when coming onto a major crime scene. The program features explicit crime scene video and photos with Mr. Heil explaining in detail the areas of utmost concern for officers charged with protecting crime scenes. Not only is there graphic crime scene video and photos used in this tutorial but also Mr. Heil walks through a simulated homicide scene point-by-point for officers. A critical training resource for law enforcement.

PL-80
VHS ONLY

IN THE LINE OF DUTY - KEHOE BROTHERS SHOOT-OUT/OHIO + CONCEALMENT AND COVER TUTORIAL
The first complete training documentation ever produced dealing with the dramatic shoot-out in Ohio between law enforcement and the Kehoe brothers, known para-military extremists. This will include in-depth training interviews with both officers involved and will provide the first-ever crucial "Lessons learned" and officer safety and survival tips. The complete video, of course, will be used in this tutorial by the two officers involved in one of law enforcement’s most extraordinary incidents ever caught on cruiser cam. Additionally, a training tutorial from Jim
Crotty of @Strategies for Officer Survival@ will be included zeroing in on the critical first moments of concealment and cover for an officer in a lethal force incident.

**PL-81**  
**IN THE LINE OF DUTY - FRESNO MULTI-ETHNIC COMMUNITY POLICING**  
(VHS ONLY)  
(39 minutes)

Many agencies now must deal with the dilemma of communities which have a multitude of ethnic groups and languages. In some cases scam artists and predators have used new arrivals’ lack of familiarity with U.S. law enforcement to insinuate themselves into people’s homes. Robbery, rape, and even murder have been the result. Now, learn how the Fresno (CA) police department has developed one of the nation’s most visionary community policing programs in a multi-ethnic environment. Complete detailing of how Fresno has successfully evolved their approach in one of the U.S.’s most ethnically-diverse cities (nearly 80 different cultures). The innumerable lessons Fresno has learned are included plus a checklist for your department to study as you continue development of your own community policing program in multi-ethnic, multi-cultural surroundings.

**PL-82**  
**IN THE LINE OF DUTY - SUICIDE BY COP (55 minutes)**  
(VHS ONLY)

After deputies give chase to a subject following an armed robbery, he stops, exits his vehicle, and points his weapon directly at the first arriving officer. The result, recorded dramatically by two cruiser cameras, is @suicide by cop@. The program includes in-depth interviews with the officer and his back-up plus details the many enforcement as @suicide by cop@. A first-of-its-kind program which is a must for police officers everywhere who could easily find themselves in similar predicaments.

**PL-83**  
**IN THE LINE OF DUTY - WARREN HOT PURSUIT/EVOC TRAINING**  
(VHS ONLY)  
(11 minutes)

A suburban Detroit police officer robs a bank and leads Warren, Michigan officers on a high speed pursuit. His expertise in eluding the officers is analyzed in this incident completely captured on tape.

**PL-84**  
**IN THE LINE OF DUTY - DEALING WITH METH LABS (39 minutes)**  
(VHS ONLY)

This video provides a street officer’s informational training program on methamphetamine use and lab detection. This program, therefore, will address the skyrocketing use of methamphetamines and the accompanying problems faced by law enforcement. It has important lessons learned from agencies at the forefront of the meth wars, and how they’re dealing with the problem. Many meth safety issues for street officers will also be addressed.

**PL-85**  
**IN THE LINE OF DUTY - THE DO’S AND DON’TS OF SERVING WARRANTS**  
(VHS ONLY)  
(11 minutes)

It can be the law enforcement officer’s most dangerous task. This 11 minute video hits the major points of how to prepare for serving the warrant, and executing it.

**PL-86**  
**IN THE LINE OF DUTY - GANGS UPDATE**  
(VHS ONLY)

Including dramatic gang footage from throughout the nation, this program promises to be a critical training product for officers nationwide, even worldwide. Through in-depth interviews with law enforcement gang experts, learn about trends in a wide variety of gang-related activity.
To be included are updates on Hispanic gangs; Russian gangs; Street gangs; Hell’s Angels’ Black gangs; and A tagging.

**PL-87**

**IN THE LINE OF DUTY - POLICE OFFICER STRESS**

How officers can deal with the stress and trauma of everyday police work; Featuring nationally-respected police clinician Dr. Angela Wingo with emphasis on earth shattering incidents, i.e. 9-11-01 to day-in, day-out cop stresses and stressors. A vital program for every agency wanting to help its officers deal most successfully with the rigors of the job.

**PL-88**

**IN THE LINE OF DUTY - MURDER OF GEORGIA DEPUTY**

The complete training overview and analysis of the murder of Georgia Deputy Kyle Dinkheller. This program includes the complete in-car cruiser cam video from Dinkheller’s patrol car. Also, interviews with virtually every back-up officer and administrator with the agency involved. Many critical lessons learned are imparted in this tragic, dramatic and absolutely critical training video for cops.

**PL-89**

**IN THE LINE OF DUTY - ACCIDENT SCENE PRESERVATION/WHAT EVERY STREET OFFICER SHOULD KNOW**

Featuring the nationally-respected Georgia State Patrol accident reconstruction team; the highly-trained members of the team teach officers the many crucial do’s and don’ts at accident scenes; how to preserve evidence; how to maintain perimeter and crowd control; interviewing witnesses; preparation for court; and many other elements; includes very graphic video/photos of various accident types.

**PL-90**

**IN THE LINE OF DUTY - HIGH SPEED PURSUIT/OH PURSUIT TAKES ON EPIC PROPORTIONS**

A pursuit through Ohio countryside takes on epic proportions when officers from many agencies become involved in a pursuit that goes on seemingly forever. The pursuit on narrow, rain-slickened roads will offer many points for discussion and training and includes through interviews with the officers involved. For any agency ever involved in multi-jurisdictional pursuits and/or considering pursuit policy revisions, this program is a must.

**PL-91**

**IN THE LINE OF DUTY - FRIENDLY FIRE KILLS CA OFFICER/HOW FRIENDLY FIRE LED TO UNDERCOVER COP’S DEATH AND HOW TO PROTECT AGAINST IT**

This training video is vital to law enforcement agencies which have a strong undercover program. It is cored around the tragic, accidental shooting death of an undercover Oakland (CA) officer who’d been trying to make an arrest. Mistaken as one of the bad guys, uniformed officers shot him dead before realizing he was one of their own. Complete overview and analysis plus training interviews with nearby San Francisco Police on safety precautions for undercover cops working near uniforms. Don’t miss this one!

**PL-92**

**IN THE LINE OF DUTY - SOUTH CAROLINA OFFICER STRUCK BY DRUG SUSPECT IN VEHICLE/SUBSEQUENT SHOOTING DEATH**

There are many training issues involved when South Carolina officers attempt to arrest a drug suspect behind the wheel of a vehicle. This dangerous nighttime operation was completely recorded on video and is analyzed for the numerous learning points by the officers involved. A
drug suspect refuses to get out from behind the wheel of a vehicle. Instead, he drives forward and bumps an officer. Fearing for their lives, the officers open fire, killing the suspect. For tactics and strategy this video should be mandatory viewing. There is also a short segment on dealing with the media.

**PL-93**  
**IN THE LINE OF DUTY - DEPUTIES MURDERED ON WARRANT SERVICE**  
Every cop who has ever been on a warrant service knows the numerous inherent dangers of such work. Two Idaho deputies are shot and killed during a warrant service in a rural area. Our training video should be watched by all officers who have ever been or ever will be on a warrant service. Includes in-depth analysis of the incident plus critical safety tips and learning points for all law enforcement personnel doing warrant services.

**PL-94**  
**IN THE LINE OF DUTY - DUI PATROL - WINNING IN COURT**  
One of the most successful DUI programs in the country is featured for training purposes; the Indianapolis Police Department’s nationally-recognized DUI arrest/prevention program is shown and includes information officers need to know about testifying in court in DUI cases.

**PL-95**  
**IN THE LINE OF DUTY - IRON WILL TO SURVIVE-PART II BLINDED TROOPER DISCUSSES SURVIVAL AND MOTIVATION (39 minutes)**  
The story of survival and rehabilitation of a Louisiana state trooper, blinded by a gunshot injury and his incredible fight back. Lessons learned and motivational uplift for every officer no matter where he/she may be.

**PL-96**  
**IN THE LINE OF DUTY - OFFICER SHOT, KILLED AFTER MISSING WEAPON ON PATDOWN (35 minutes)**  
The training story of a great arrest by two St. Louis officers which turned tragic - - when they missed a weapon on a pat down. The video details the arrest of a cop shooter and his subsequent murder of one of the arresting officers. The subject had apparently had a gun in the back of his pants by the crook of his back. This program also features complete and thorough pat down training.

**PL-97**  
**IN THE LINE OF DUTY - GROUNDFIGHTING TRAINING PART I (29 minutes)**  
This program features superb groundfighting training scenarios taught by nationally-regarded d.t. instructor Sgt. Herb Hood of the Cincinnati Police Division. Not only the training but also many video clips are analyzed in which both police and security officers found themselves in groundfighting situations.

**PL-98**  
**IN THE LINE OF DUTY - GROUNDFIGHTING TRAINING PART II (42 minutes)**  
This program features superb groundfighting training scenarios taught by nationally-regarded d.t. instructor Sgt. Herb Hood of the Cincinnati Police Division. Not only the training but also many video clips are analyzed in which both police and security officers found themselves in groundfighting situations.

**PL-99**  
**IN THE LINE OF DUTY - IRON WILL TO SURVIVE-PART III (38 minutes)**  
An ex LAPD officer grievously wounded in the North Hollywood shootout discusses his determination to survive his sounds and fight back. Complete and dramatic video of incident
from beginning to conclusion. First law enforcement video training program produced of this monumental incident. Lessons Learned/Analysis.

**PL-100**
**IN THE LINE OF DUTY - DRUG INTERDICTION - PART I**
VHS ONLY

Excellent police work by young Illinois officer who stopped a suspicious vehicle and ultimately found nearly a million dollars in drugs hidden. Top to bottom video of incident and complete analysis/interviews pertaining to the release of a suspect from a legal standpoint. This program will pay off in big dividends for officers trying to make excellent stops/seizures and wanting to legally/appropriately detain suspect subjects.

**PL-101**
**IN THE LINE OF DUTY - TN OFFICERS SHOOT, KILL BANK ROBBER** *(49 minutes)*
VHS ONLY

Dramatic video of Tennessee bank robbery from two different cruiser cameras and officers fatally wounding robber. This program will include complete interviews with officers involved, who were also wounded in the shoot-out.

**PL-102**
**IN THE LINE OF DUTY - CORRECTIONS/JAILERS SAFETY** *(33 minutes)*
VHS ONLY

The program will provide in-depth information and training for corrections officers/jailers regarding safe dealings with inmates/convicts: to include scams which cons use to try to get over on officers; weapons and equipment safety and what to do when riots break out; and many other issues critical to officer safety.

**PL-103**
**IN THE LINE OF DUTY - CORRECTIONS/JAILERS SAFETY II** *(2004)*
VHS ONLY

In part two, officers gain critical insight into response to jail/prison melees and remaining calm and observant...mental preparation for riot situations...also, inmate scams on officers are explored which is vital especially for new officers; awareness of inmate lying and subterfuge is examined. Also, complacency, the Anything happens here mentality is a focal point of this program. Experts from the maximum security Soledad Prison in California provide the training.

**PL-104**
**IN THE LINE OF DUTY - BALTIMORE OFFICERS SHOOTS HOMELESS PERSON** *(2004)*
VHS ONLY

A Baltimore officer in the heat of a crowded marketplace shoots a homeless man who appears to be pulling an edged weapon on him. This program includes complete video of the incident and audio plus an interview with the officer. It is a must for any officer who could easily find himself/herself in a similar, highly charged scenario. It also includes in-depth training analysis and tutorial. This is an excellent example where less lethal would have been applicable.

**PL-105**
**IN THE LINE OF DUTY - MO TROOPER TALKS BANK ROBBER INTO RELEASING HOSTAGE** *(32 minutes)* *(2004)*
VHS ONLY

After a rural Missouri bank is robbed, the robber flees with a terrified customer passenger. The ensuing chase through two states is recorded by videographers; the robber finally loses control North of St. Louis, and his vehicle lurches down a wooded embankment. A veteran Missouri trooper is able to negotiate the subject (who is threatening his hostage’s life) into surrender. Complete lessons learned/training analysis via an in-depth interview with the trooper are included in this important program. Back up consists of a Racial Profiling refresher.
PL-106  VHS ONLY
IN THE LINE IF DUTY - PIT BULLS & DOGFIGHTING (42 minutes)
This special issue from In the Line of Duty reviewed the brutal, blood thirsty sport of dogfighting, how to stop it and make great arrests for a multitude of other crimes, ranging from drug trafficking to money laundering to racketeering. Also, preserving dogfighting crime scenes’ gathering evidence/what to look for and beating them in court. Learn how you can also generate revenue for your municipality, city and county by making good arrests of dogfighters and those who attend dogfights. Other law enforcement agencies are doing it now!

PL-107  VHS ONLY
IN THE LINE OF DUTY - LAS VEGAS COPS DEAL WITH BIKER SHOOT OUT
(46 minutes)
A wild biker shoot-out is caught from beginning to bloody end on several of the 54 surveillance cams at a Laughlin, Nevada casino. See the incident, and learn how Metro Las Vegas officers responded to this extraordinary incident. This will include analytical interviews with several of the first responding officers and additional training on dealing with biker gang activity nationwide and how to prepare for and deal with it.

PL-108  VHS ONLY
IN THE LINE OF DUTY – SAN FRANCISCO OFFICERS DIE IN RESPONSE CRASH
A horrific t-bone accident kills one San Francisco officer and critically injures two others during an emergency response. The officers’ two cruisers’ sirens were “washed out” by one another, and they literally could not hear one another during this pursuit. Learn step agencies are taking to deal with the “washout” phenomenon and measures law enforcement is taking to try to avoid such tragedies.

PL-109  VHS ONLY
IN THE LINE OF DUTY - OFFICER TRIES TO BLOCK MOVING SUBJECT’S CAR
(34 minutes)
A highway patrol officer stands in front of a stopped subjects car ordering the individual not to proceed. When the subject however DOES continue driving forward, the officer draws his service weapon and fires numerous times at the fleeing individual striking him. This is a very important use of force program each officers needs to see.

PL-110  VHS ONLY
IN THE LINE OF DUTY - COPS’ RESPONSE TO HATE CRIMES (32 minutes)
 Virtually all law enforcement agencies have dealt with them: hate crimes. Whether they’re ethnic, gangs, sexual preference, economic or without category, police officers need to learn how to best approach and deal with this problem. Our program provides officers with much critical information and arms them with many tools/resources which they’ll need when responding to hate crimes.

PL-111  VHS ONLY
IN THE LINE OF DUTY - POLICE FACE MAN WITH EXPLOSIVE DEVICE
(41 minutes)
A mentally deranged man attempts to firebomb the house where his estranged wife is staying in rural Bourbon, Missouri. Police are on the lookout and have a description. They confront the suspect in a gas station. He detonates an explosive device . . . in a gas station.
IN THE LINE OF DUTY - DEKALB COUNTY (TN) POLICE SHOOTING (42 minutes)
2004
An escaped prisoner with apparent mental problems abducts her own son and threatens him with a gun. Police negotiations get nowhere. A deputy, convinced the woman is about to kill the child, fires, striking her in the head. This is dramatic video with many lessons learned.

IN THE LINE OF DUTY - WEAPON RETENTION (34 minutes) 2004
One of the nation's premiere law enforcement trainers, Herb Hood, provides complete and thorough training on his newly-developed and easy-to-learn weapons retention system. This is a must and possible life-saver for any officer working the street.

IN THE LINE OF DUTY - JASON’S STORY (46 minutes) 2004
Phoenix Officer Jason Schechterle was nearly burned alive just because he was in the wrong place at the wrong time. His cruiser had been at a stop light when it was struck at 90 miles an hour by a taxi driven by an epileptic cab driver. Learn some of life's most important lessons for survival when you meet this incredible Phoenix cop. (Includes dramatic, compelling video at accident scene).

POLICE LIABILITY SERIES - USE OF FORCE (17 minutes) 2004
This video gives a brief of explanation of how officers can be sued in Federal and State court in association with use of force cases. It addresses consistent and detailed report writing and reviews three scenarios when cases are settled, dropped and litigated. It stresses the importance of consistent and detailed report writing and reviews three scenarios when cases are settled, dropped and litigated.

POLICE LIABILITY SERIES - PURSUIT AND EMERGENCY RESPONSE (16 minutes) 2004
This video gives an explanation of how officers can be civilly sued in association with vehicle operations. It reviews protecting the public from harm vs. the need to apprehend, when to terminate a pursuit and even if one should be initiated. It also addresses reasonable and prudent actions and defense strategies.

IN THE LINE OF DUTY - CONNECTICUT OFFICER ATTACKED (45 minutes) 2004
A Connecticut officer has less than four seconds to decide what to do when a subject he had been pursuing jumps out of his car and lunges at the officer with a tire iron. In an instant, the officer had to decide whether to use lethal force; draw and fire. How would you respond to such an attack. Don’t ask the subject in this incident. He's dead.

IN THE LINE OF DUTY - KNIVES CAN KILL YOU FAST (42 minutes) 2005
This is an extremely important training program for your library. In it, one of the leading law enforcement experts in the world teaches and trains you to survive a knife attack/assault. The program will provide step by step training that will be segmented for convenient use in roll call, in service and academy training.

collision with another responding officer, slams on his brakes in an attempt to disable a pursuing vehicle and is finally rammed in order to bring to gunfire to a close after tire spikes are used.

**PL-127**

**IN THE LINE OF DUTY - WISCONSIN OFFICERS STOP JUMPER (43 minutes) 2005**

Law enforcement at its very best. Two separate incidents. Two lives saved! You will be proud of your fellow officers when watching this video. And, you will learn from their heroics.

**PL-128**

**IN THE LINE OF DUTY – TROOPER SAVED BY PASSENGER- (38 minutes) 2005 SIDE APPROACH**

Law enforcement officers all over the country are changing their approach (literally and figuratively) as a result of this video. The whys and wherefores of the passenger-side approach with dramatic evidence of how it saved one officer’s life.

**PL-129**

**IN THE LINE OF DUTY – MISSED PATDOWN HORROR STORY (37 minutes) 2006**

San Bernardino municipal and county officers made a mistake that could have been more deadly than it was when they arrested a man accused of shooting an officer. A gun hidden in the man’s waistband was missed in a patdown. The man pulled the gun in a holding cell and committed suicide. He could have shot an officer. Important lessons learned here.

**PL-130**

**IN THE LINE OF DUTY – WHAT DOGS TRY TO TELL COPS (36 minutes) 2006**

Within a period of less than a year, 2 Tennessee officers put down dogs in separate incidents. It led to a national outcry and to a need for officers to better understand animal behavior. This program is designed to do just that, and to provide useful information for officers to protect themselves if attacked by dogs.

**PL-131**

**IN THE LINE OF DUTY – CINCINNATI WHITE CASTLE INCIDENT (54 minutes) 2005 – UPDATED & TASERS**

This is an updated version of the celebrated In the Line of Duty video on how officers can do everything right and things go wrong. In this case, a druggie high on a variety of drugs resists officers. After a long struggle, he is subdued, but moments later, dies. This program is a must for every street cop.

**PL-132**

**IN THE LINE OF DUTY – SC OFFICER RUN OVER BY SUV SURVIVES TO NAB HIS ASSAILANT (45 minutes) 2006**

Remarkable video of the confrontation. At the end of the chase, with the driver of a stolen vehicle cornered, the driver steps on the gas as a veteran officer approaches. The officer is struck, but comes up firing. More than a dozen rounds later, the driver is in custody.

**PL-133**

**IN THE LINE OF DUTY – COURTHOUSE SECURITY (51 minutes) 2006**

The deadly Fulton County Courthouse triple murder in Atlanta has brought attention to the courthouse security issue. This program focuses on how a law enforcement officer who is involved in aspects of courthouse/courtroom security needs to know to make that security more effective whether jurisdiction is large or small; rich or lacking in financial resources.

frequency and high severity injuries. It also covers proper methods for inspections and documentation.

**RPE-4** SAFER PLAYGROUNDS THROUGH TESTING (6 minutes) 2005

This video gives a quick overview on what to look for to identify two of the most dangerous playground equipment hazards; head entrapments and strangulation. It identifies common problem areas and how to use test gauges.

**SUPERVISOR AND EMPLOYEE SAFETY DEVELOPMENT**

**SES-2** SAFETY COORDINATOR TRAINING (23 minutes) 2003

This video gives the in and outs of what to do as a safety coordinator and how to go about doing it. It addresses working with management and employees, policy development and implementation.

**SES-3** SAFETY LEADERSHIP FOR EVERYONE (23 minutes) 2004

This video examines the unspoken feelings about working safely. Is safety really #1 or does our actions show otherwise. Does the department only work safely when time allows? What message does your safety incentives send? What makes a good safety leader?

**SES-4** SAFETY AWARENESS FOR SEASONAL EMPLOYEES (23 minutes) 2005

This video covers a variety of safety hazards and safe practices applicable to seasonal and volunteer employees who work in parks and recreation, public works, maintenance and other municipal departments. A "Supervisor's Guide" accompanying this video is also available.

**SES-5** DON’T BET ON IT! (15 minutes) 2005

By bypassing or ignoring safety rules and procedures, some employees are making the decision to risk their lives. Will their gamble pay off? Don't bet on it! This program examines some of the underlying reasons for the choices some employees make. A comparison is drawn between not following safety guidelines and the game of Russian Roulette. If a person continues to take chances with safety and “spins the cylinder”, eventually they will hit a "loaded chamber"...game over.

**SES-6** WHAT WOULD YOU SAY? (16 minutes) 2006

This program illustrates how to effectively communicate with our co-workers when we see them behaving unsafely. The video features three potentially hazardous workplace incidents in which workers confront co-workers about their unsafe behavior. In each incident examples of poor communication are demonstrated. Next, effective communication techniques are demonstrated that help correct the unsafe behavior.

**SES-7** ONE WILL DIE: THE JOHN MARTIN STORY (22 minutes) 2006

This powerful program brings a dramatic true story to life in an unforgettable illustration of the horrific injuries and life-changing consequences that resulted from John's unsafe work practices and poor safety attitude. This video will demonstrate how the choices we make each day can impact ourselves, our families and our coworkers.
You know the TV show America’s most wanted? This video takes three issues that cause most accidents and injuries in the workplace—complacency, uncorrected errors and shortcuts—and personifies them, brings them to life as these sinister wanted criminals. They are actually interviewed with their faces blacked out as though they are in witness protection and recount the ways they plot and scheme to undermine workplace safety, and cause workers to harm themselves both at work and at home. They explain how they trick people psychologically into complacency and shortcuts. Interspersed with the interview are dramatic reenactments of accidents caused by complacency, uncorrected hazards and shortcuts.

An Extra Effort for Safety Sake addresses the importance of safety, the financial and emotional impact accidents and injuries can have, why safety needs to be a part of every task performed, and best practices to prevent incidents from occurring at your site. Filmed in multiple locations, this program will have a positive and lasting impact on your safety culture and motivate all employees to incorporate safety into every task they perform to help create an accident free work environment.

While working as a paramedic it is often heard that “I just wasn’t thinking” or “I didn’t think.” In this presentation someone who has been there uses on-the-job experiences to show that taking a moment to think and act can have a huge impact on our lives and the lives of our families.

Do your employees believe an accident free workplace is a possibility? Let Billy Robbins convince them that it is absolutely possible if they are highly motivated, committed and have a vision for it. In this video Billy shows viewers how changed attitudes produce safety. Billy’s blend of humor, audience participation and the story of his own incident drive home that point that accidents don’t just affect your life, but also the lives of everyone around you.

In this unique safety presentation, we witness children using common excuses not to wear safety gear; “It’s uncomfortable,” “Don’t worry, nothing will happen to me,” etc. But when the kids discover their parents using those same childish excuses at work, they wonder how their parent’s attitudes would change if their children were to come to work with them.

Excuses, excuses—we all have given and heard our share of excuses. We often make excuses so fast and with so little thought that we fail to realize how dangerous they can be. This program features many common workplace examples of people using excuses to justify unsafe acts.

This video shines the spotlight on three injury causing culprits: the prankster horseplay, the “get it done cowboy” and the infectious apathy are each exposed as a source of workplace injury. The viewer will learn that by refusing to participate in horseplay, not calling on the cowboys to “get it
done” and refusing to be infect with someone else’s apathy towards safety, we can all help create a safer workplace.

SES-15  LEADING INDICATORS: IT'S THE LITTLE THINGS (17 minutes) 2009

Jeff “Odie” Espenship is a former USAF fighter pilot and one of the most sought-after safety speakers in the industry today. As a flight leader, he knows what it takes to operate safely in high-risk and sometimes dangerous work environments. In this dynamic presentation, Odie shares his experiences and relates them back to common workplace situations. Shortcuts: How they get introduced into the workplace and become "normalized”. Snap Decisions: How impulse actions can get us into trouble. Complacency: Safety and operational excellence is never routine. The importance of speaking up if we see an unsafe act.

SES-16  READY, WILLING AND ABLE (22 minutes) 2009

Employees being ready, willing and able to give and accept constructive safety feedback is one of the most powerful and effective ways to improve workplace safety. In this unique presentation, Safety Professional Tom Harvey encourages viewers to have the confidence and courage to engage in a constructive safety conversation when a safety problem arises. He also reviews the guidelines that we all should follow once we make the commitment to get involved in the feedback process. Real-world examples of workers communicating with one another are used to illustrate how positive reinforcement is a far better method of encouraging safe behavior than giving negative feedback and criticism.

SES-17  “KNOCK IT OFF (16 minutes) 2010

Mr. Jeff “Odie” Espenship is a United States Air Force A-10 Warthog fighter pilot and international airline pilot. As a popular motivational speaker, Odie uses his unique experiences to connect with audiences and explain how to work safely in a high-risk and sometimes dangerous environment. He mentions that a dangerous environment includes operating a fighter plane, as well as repairing a sewer line, operating a forklift, or working around electrical lines. Mr. Espenship discusses the fighter pilot concept of a “knock it off” immediately when recognizing a dangerous situation or behavior. His friend Mr. Wes Sharp encourages you to speak up and tell co-workers to “keep off the grass” when they witness an unsafe act. All of the material and concepts that are reviewed in this video can be utilized within your departments.

SES-18  Is TODAY Your DAY? (23 minutes) 2011

The IACP and the National Highway Traffic Safety Administration (NHTSA) recognize the lifesaving value of law enforcement officers’ wearing their seatbelts. This video underscores the tragedies that regrettably result from officers’ failing to wear their seatbelts. Unfortunately, too many situations over which officers lack control arise during their careers. However, these situations should never include not wearing seatbelts, being ejected during a collision, and being seriously injured or killed. These circumstances are preventable and require leadership to ensure that officers do not needlessly place themselves in harms way.

SES-19  THE EVERYDAY SECRET FOR RESULTS EVERYDAY (30 minutes) 2011

This is the audio CD of Matt Forck’s presentation from MIRMA’s 2011 annual meeting

How many of you are sick-and-tired of being appreciated by your boss? How many of you have co-workers who complain about being over-appreciated? Okay, let’s get real, how many have even heard what sounds remotely like a compliment in the last six months! Studies reveal that for every seven positive thoughts we have about another person we share just one. If we are going to
lead our organizations to top-tier industry performance, we will have to understand the purpose and power of feedback and in so doing, find The Everyday Secret for Results Everyday.

**SUPERVISOR MANAGEMENT DEVELOPMENT**

**SMD-1**
**CONFLICT COMMUNICATION SKILLS (16 minutes)**
This video teaches employees essential techniques for using effective communication in conflict situations. It will help them maintain control while keeping the respect of co-workers. A 12-step process for development of conflict communication skills is reviewed.

**SMD-2**
**TRAINING EMPLOYEES TO MEET SAFETY STANDARDS (6 minutes)**
This brief video reviews safety training to instill personal safety responsibilities in employees, reviews correcting unsafe acts and the essential elements of a safety program.

**SMD-3**
**SUPERVISOR’S SETTING THE EXAMPLE (5 minutes)**
The example the supervisor sets will influence employees more than words. This video illustrates the concept of “leadership by example” which increases respect for the supervisor, productivity, morale, efficiency and cooperation among employees.

**SMD-4**
**DISCIPLINE - THE SUPERVISOR’S ROLE (25 minutes)**
In this video it explains what discipline is all about and how to achieve it through counseling and documentation. There is a discussion of avoiding disciplinary actions and the importance of treating employees consistently with dignity, courtesy and respect.

**SMD-5**
**CONFLICT COMMUNICATION SKILLS (15 Minutes) 2013**
At some point in your work history, you will encounter some form of hostility. Whether it's an upset co-worker or a dis-satisfied customer, your response can make the difference between a stressful and a pleasant work environment. This video will cover basic conflict communication skills and how they can be used to defuse hostility.

**SAFETY COMMITTEES**

**SC-1**
**IMPROVING SAFETY COMMITTEE EFFECTIVENESS (11 minutes)**
When a safety committee is properly formed, supported and budgeted, it can be invaluable to the safety program. Change the function of your safety committee from one of lip service to meaningful action using the tips presented in this program. Safety committees can do much to improve safety awareness, communications and training.
SC-2  SAFETY COMMITTEE PARTICIPATION (10 minutes)
VHS ONLY

In this video, the purpose of safety committees are reviewed, the functions and procedures of the committee and the steps which should be followed when holding a safety committee meeting.

SLIP, TRIP, AND FALLS

STF-1  SLIPS, TRIPS, AND FALLS (14 minutes)
VHS ONLY

Thirteen million people each year suffer from the effects of slips, trips, and falls - the number two leading cause of accidental death. This live-action videotape program explains ways to recognize, avoid and control hazards that may lead to slips, trips and falls.

Featured are:

* The explanation of what part friction, momentum and gravity play in slips, trips and falls.
* How the body uses eyes, ears and muscles to keep balance.
* The appropriate safety shoes to wear on different types of surfaces.
* Measures to take to minimize the potential for trips around the house and at work.
* Proper uses of ladders, scaffolds and platforms.
* Minimizing the effects of falls when they occur.
* What to do when a fall occurs.
* Review of major points by following Andy Upright through a slips, trips and falls obstacle course.

STF-2  SLIPS, TRIPS AND FALLS (12 minutes) 2006
DVD ONLY

This engaging and fast-paced program will motivate your employees to recognize and respect the common causes of slips, trips and falls, and teach them procedures and techniques to prevent them from occurring and causing injury. This program will have a positive impact at your work site.

STF-3  FALL FACTORS: UNDERSTANDING & PREVENTING SLIPS, TRIPS AND FALLS (19 Minutes) 2013
DVD ONLY

This video will help you and your workforce understand how and why falls occur. The video will cover how controlling our center of gravity helps us maintain our balance, how gravity, friction and momentum contribute to slips, trips and falls. This video also covers the importance of proper footwear for the surface that one will be traveling, what precautions to take to prevent falls resulting from slips and what types of unsafe acts contribute to fall-related accidents.

STF-4  WINTER WALKING: STAYING ON YOUR FEET (10 Minutes) 2014
DVD ONLY

By its very nature, winter walking is a seasonal safety issue and limited to several months. Yet thousands of serious injuries happen every winter. The personal and financial impacts of a wintertime injury can last throughout the year for the individual and for the employer. This safety video helps the viewer understand the need to adjust our walking behavior and techniques when the snow begins to fall. This program will also review why we need to adjust our walking techniques in winter, what winter hazards to look for and procedures and tips to help keep you on your feet.
SNOWPLOW INSTRUCTION

SN-3
DVD ONLY

SNOWPLOW SAFETY (23 minutes)
This video focuses on collision prevention techniques and other safety issues specifically involved with driving a snowplow. Topics covered on the video include: equipment inspections, positioning of the truck, scanning, mirror use, defensive driving techniques and on-screen diagrams that allow for discussion of collision prevention techniques.

SN-4
DVD ONLY

SNOWPLOW SAFETY - PARKING LOTS (19 minutes)
This video focuses on specific safety issues regarding the plowing of parking lots. Topics reviewed include: pre-season preparation, equipment inspection, scanning for hazards, clearing entrances and exits, working with other snow removal equipment and where to locate the plowed snow.

UNDERGROUND UTILITY SAFETY

UUS-1
VHS ONLY

UNDERGROUND SAFETY - JOBSITE HAZARDS (10 minutes)
Keeping the worksite free of debris, working around underground utilities and overhead lines, safety in traffic zones.

UUS-2
VHS ONLY

UNDERGROUND LOCATION SAFETY (5 minutes)
This video reviews the ACall before you Dig@ protocol using USA-Underground Service Alert Process. Missouri as well as most states have this program in effect. By calling and getting a utility locator prior to digging, you lesson your chances of damaging underground utilities, equipment or possibly injury to your employees. The phone number in Missouri is 1-800-DIG-RITE.

UUS-3
VHS

GAS IGNITION (10 minutes) 2004
This video is a re-enactment of a gas flash fire that occurred when a gas crew was making a repair on an active line. The fire engulfed two workers in flames who where protected by their Nomex suits and supplied air respirators. The men were then pulled to safety and extinguished by the attendants. It drives home the importance of proper personal protective equipment, safe work procedures and demonstrates just how quickly the routine can become the remarkable.

UUS-4
DVD ONLY

DIGGING DANGERS 18 (19 minutes) 2009
This video looks at things gone wrong--from a damage prevention viewpoint as well as from a post-accident viewpoint. Excavators, utility personnel, and emergency responders will benefit from viewing Digging Dangers 18: Disaster Prevention. The video will help train your personnel about new Federal legislation requiring excavators to call 911 in the event of striking gas pipelines. In addition, it will make workers pause to think about their actions if confronted with similar circumstances.
WASTE MANAGEMENT

WM-1
RESIDENTIAL PICK-UP DRIVING & HELPERS (13 minutes)
VHS ONLY
In this program there is an emphasis for each employee to act responsibly to avoid accidents and provides many safety rules for helpers. Included are rules for safe lifting of containers, backing safely, the use of standard signals, child safety, animal control and safe riding & walking.

WM-2
WORK STANDARDS & SAFETY FOR SOLID WASTE (12 minutes)
VHS ONLY
In this basic presentation about employee rules and regulations, the waste management/refuse department is featured. Common sense rules on employment procedures are discussed regarding residential pick-up and land fill areas.

WATER & SEWER WATER PLANT SAFETY AND BACKUPS

WPS-1
WATER & SEWER TREATMENT PLANT SAFETY (17 minutes)
VHS & DVD
The water/waste water industry have a higher injury rate than mining, construction or logging. Increase employee awareness with this video which reviews: housekeeping, tools, ladder safety, fall protection, confined spaces, chemicals respiratory protection and emergency action plans.

WPS-2
WATER/SEWER TREATMENT PLANT SAFETY (10 minutes)
VHS ONLY
Treatment plants, though having nice and clean areas to work in, can be hazardous. Working with and around pumps, electricity, laboratories and related chemicals require special training. This video addresses the risk and hazards as well as methods of risk avoidance in the treatment plant.

WPS-3
LOSS CONTROL FOR SEWER BACKUPS AND OVERFLOWS (20 minutes) 2005
VHS & DVD
The video starts off with an overview of the issues and causes everyone faces when confronted with the costs of backups and overflows. It then shows how a five-step process can control losses, claims and lawsuits by using proper documentation, system management and public education to: "1. Document It / 2. Map It / 3. Track It / 4. Fix It / 5. Teach It"

WPS-4
RESPONDING TO BACKUPS AND OVERFLOWS (20 minutes) 2005
VHS ONLY
This video is developed for field personnel responding to actual backups and overflows, this program teaches them step-by-step:

* Why's and how's of not admitting, "fault" or liability during a response *
* How to respond in a professional and courteous manner *
* Survival strategies for dealing with homeowners & residents *
* Working on backups & overflows may not be rocket science, But dealing with the Public can be a fine art"
WELDING SAFETY

WS-1  WELDING SAFETY (5 minutes)
VHS ONLY
Provides an overview of OSHA 29 CFR 1910.251-255 which regulates safe welding activities. The video covers hazards and personal protective equipment, fire safety and hazardous atmospheres.

WS-2  HIGH IMPACT: WELDING SAFETY (17 minutes) 2011
DVD ONLY
The video shows viewers that a commitment to welding safety is the key to maintaining an injury-free workplace and even saving a life. It is filled with re-creations of six actual accidents involving welding from OSHA files. The accidents recreated include: sparks and slag from overhead welding operations that ignite a fire, failure to use exhaust ventilator results in an employee getting sick, oxygen from a leaking hose sets a welder’s clothes on fire, a ladder that was removed from service causes an injury, employee killed from not following a policy, and another worker killed while operating an electric welder on a wet floor.

WORPLACE VIOLENCE

WPV-1  DOMESTIC VIOLENCE (99 minutes)
VHS ONLY
In this video employees and supervisors are made aware of the serious problem of domestic violence and the crossover of when violence at home becomes potential violence at work. Employees will learn to understand general facts about domestic violence (DV), identify the risks associated with this type of violence, understand how domestic violence affects the bottom line, identify early warning signs, develop a risk control program, and learn how to reach to other resources for help.

WPV-2  BLUEPRINT OF WORKPLACE VIOLENCE (113 minutes)
VHS ONLY
This video draws out a blueprint of the factors that leads up to violence in the workplace. Employees are given statistics about the different types violence seen in the workplace, who commits these acts, definitions, components of anger, reviews the anger chain, momentum of anger, dangers of anger, anger intervention, patterns to look for, constructive and safe discipline process, healthy vs. unhealthy responses to termination, and discusses recommendations for prevention.

WPV-3  ACTIVE SHOOTER AND WORKPLACE VIOLENCE (10 Minutes) 2016
DVD ONLY
Emergencies involving violence are unfortunately a real possibility in today's workplace. This can also include encountering an active shooter on the premises. One of your job responsibilities is to be prepared and know how to respond should such an emergency occur at your workplace. Knowing the proper procedures to follow during an emergency could mean the difference between life and death. This video will cover how to properly respond when someone displays violent behavior, how to respond properly to a situation involving an active shooter and how to react appropriately when law enforcement arrives on an active shooter scene.
**WORK ZONE SAFETY**

**WZS-2**

**TRAFFIC CONTROL - SMALL JOBSITES (5 minutes)**

VHS ONLY

Protect both the public and your employees through education in safe and effective traffic control procedures. The video covers common causes of traffic control accidents, traffic control devices and basic flagging requirements for your local job sites.

**WZS-3**

**ROADWAY WORKER SAFETY – IN THE ZONE (24 mintues) 2011**

DVD ONLY

Roadway work is full of potential hazards – from passing traffic and trenches, to electrical wires and hearing loss. Help reduce injuries and fatalities with this video. Safe work practices that the video discusses include identifying roadway work hazards, flagging, night-work procedures, PPE special training, MSDS, and traffic control pattern awareness.
LOSS CONTROL TRAINING GUIDELINES

Numerous studies have indicated that the major element of successful loss control programming is effective loss control training. Effective loss control training has a positive influence on behavior thereby reducing the potential for loss. Therefore, MIRMA endorses an association program that addresses the development and institution of effective loss control training.

Training should not be conducted unless it is done in an effective manner:

- Training should be justified by a hazard analysis, cost/benefit, and/or legal requirements.
- The training objectives should be defined and communicated to participants by instructors.
- If training is justified, a retraining schedule should be identified.
- Training to reduce a specific loss exposure should be conducted after management has developed policies and procedures that address: responsibilities, procedures, training/retraining, enforcement, and monitoring.
- Post-training evaluation should be conducted to measure the effectiveness of the training.

MEMBER RESPONSIBILITIES

City Managers/Administrators should:

- Support the MIRMA Loss Control Training Guidelines.
- Require departments to identify the loss control training activities needed in their operations.
- Develop policies and procedures that will support a loss control training program.

Department Managers should:

- Support MIRMA’s Loss Control Training Guidelines.
- Develop department training requirements.
- Require managers to identify employees requiring training.
- Require managers to develop a training schedule that will minimize interruptions to the department operations.
- Forward training requirements to MIRMA Loss Control Staff.
- Open training seminars and emphasized importance and accountability of training.
- Review the effectiveness of training efforts with MIRMA Loss Control Staff.

Supervisors should:

- Identify employee training needs.
- Develop a schedule for loss control training when:
  - a new employee reports to work
  - new procedures or processes are introduced to veteran employees
  - loss control performance in general is slipping

Employees are expected to:

- Attend training seminars when scheduled
- Apply practices taught during training seminar
DEVELOPMENT METHODOLOGY OUTLINE

1. Justify training need.
   - Is there really a need to do this training? Or is it a smoke screen for other underlying poor performance factors?

2. Define learning objectives.
   - Decide what the training will accomplish. What will the participants be able to do or what will they know after the training that they cannot presently do or know?

3. Identify who is to be trained.
   - List personnel who are to be trained. Only train the necessary personnel - provide retraining for personnel consistent with MIRMA guidelines.

4. Select a communication vehicle.
   - Pick a method that can effectively communicate the learning objectives to a selected audience.

5. Set training dates/location.
   - Decide where and when the training is to be conducted according to the audience.

6. Identify evaluation process (testing).
   - The methods used to evaluate the effectiveness of the loss control training should be identified prior to the actual training. Examples of various evaluation methods include:
     - written pre and post tests
     - skills evaluation
     - verbal evaluation

7. Identify retraining.
   - If a subject is worthy of training, then somewhere in the future it is also necessary to conduct retraining. Therefore, when a training program is developed, a retraining schedule should be identified.

8. Select record keeping system.
   - Determine how the documentation of the training will be maintained - how personnel who did not pass the evaluation will be identified - how personnel will be recalled for retraining. How the retraining may be easily recalled to provide an adequate picture for auditing purposes.
LOSS CONTROL TRAINING PROGRAMS

Risk Management for Small Communities

This program is designed to explain the risk management process, examine the following areas that are common in communities and suggest ways to treat these exposures:

General Liability          Contractual Liability
Parks and Recreation      Law Enforcement Liability
Special Events            Personnel Exposures
Streets and Roads        Utilities
Property                  Vehicles

Each of these areas is discussed in terms of the exposures present, risk control methods and risk financing methods.

Contact MIRMA Loss Control Director for further details.

Law Enforcement Training Programs

Computerized Legal Education and Policy Training:

- An interactive computer training program designed to complement officer training addressing civil liability issues.

Law Enforcement Supervisory Training Seminars:

- Supervisory training for current and future police managers. Consult Association newsletter for dates and times.

Firearms training simulator:

- The Association owns a firearms simulator which can be used for officer training. Officers will be shown real-world situations and have to use their judgment as to whether to shoot or not shoot. This training aid requires both verbal and non-verbal responses. Police chiefs should contact their loss control representative to make the necessary arrangements to bring the simulator to your municipality.

Loss Control Training Programs

- Requests for training will remain as flexible as possible to meet members and MIRMA needs.
PUBLICATIONS

Materials presented under this heading are available to members by contacting MIRMA loss control staff.

Fleet

- **Guide for Determining Preventability of Motor Vehicle Accidents** - based on the National Safety Council defensive driver training program. These guidelines describe criteria useful in determining accident preventability. For use by safety committees and supervisory personnel.

Accident Investigation

Parks

- **A Handbook for Public Playground Safety (11/97)** - a guidebook for identifying the hazards associated with playground equipment and ground cover requirements.

- **Impact Attenuation Performance of Playground Surfacing Materials.** Latest guidelines on the various types of playground surfacing materials. ASTM: 1292.

- **Guide to ADA Accessibility Guidelines for Play Areas.** This guide is intended to help designers and operators in using the accessibility guidelines for play areas and establishes minimum accessibility requirements for newly constructed and altered play areas.

Law Enforcement

- **Standard for Law Enforcement Agencies (Commission on Accreditation for Law Enforcement Agencies- CALEA)** - compilation of some 900 standards organized into 58 chapters and nine topic areas.

- **Model Manual of Policies and Practices** - Models for use in developing members own policies and practices. MIRMA collects policies for use by other members. If you need a policy or have one your don't mind sharing contact our staff.

Available Policies:  Domestic Violence  Pursuit Driving
Use of Force  Reporting Use of Force
Off Duty Employment  Communicable Disease
Emergency Driving  Firearms Qualifications
Constitutional Law
EQUIPMENT

Equipment listed under this heading is available to members by contacting MIRMA loss control staff.

Law Enforcement

- **Firearms Training Simulator (MILO)** - The Association owns a firearms simulator which can be used for officer training. Officers will be shown real-world situations and have to use their judgment as to whether to shoot or not shoot. This training aid requires both verbal and non-verbal responses. Police chiefs should contact their loss control representative to make the necessary arrangements to bring the simulator to your municipality.

Electric Departments and Other Facility Inspections

- **Thermal Imaging Camera** – The Association owns a thermal imaging camera which can be used to identify and correct electrical hazards and deficiencies that could result in a fire in electrical system switchgear, breaker boxes, other components, or other equipment. Contact your loss control representative when your power plants are operating, or if you have other equipment you believe should be inspected.

Park

- **Playground Safety Inspection Kit** – The Association owns multiple sets of playground safety inspection kits used to identify a variety of recognized playground equipment hazards. If you are purchasing new or making repairs to existing play equipment this kit can identify hazards associated with play equipment. Contact your loss control representative to make arrangements to have your play equipment inspected.

Any City Facility or Job Site

- **Digital Sound Meter**: Noise induced hearing loss is a preventable condition when proper controls and protection are used. The Association owns a Sper Scientific Digital Sound Meter that can be used to identify noise exposures. Contact your loss control representative to make arrangements to monitor any possible noise exposure.

- **Slip Meter**: Slip and fall injuries occur for many reasons, such as, slippery surfaces, improper footwear, improper floor maintenance, inadequate hazard identification, and others. The Association owns an American Slip Meter ASM 725 that can determine the coefficient of friction level of your floors and walkways. Contact your loss control representative to make arrangements to test any identified slippery surfaces.

CHECKLIST/FORMS

- Checklists and Forms are an invaluable aid for individuals responsible for maintaining files or performing inspections.
- Contact our staff with your request.

RESEARCH

- Loss Analysis- report capabilities to identify past loss exposures and current trend direction.
- Subject Specific- staff research on subjects related to the development of risk management programs.
- Contact loss control staff with request.
Logging In / Setting Up a New Account

The above screen shot shows you our “new look” for the website. Setting up a new account is easy. After retrieving the website, locate the Member Login at the top of the page (shown by yellow arrow). Once you click on the Member Login, just click on the “create new account” on the right hand side under the First time visitor section (shown below with the green arrow).
After the registration is filled out, an email will be sent to your email address for confirmation. IF for any reason you do not receive the email, contact Christy at the Line of Duty office and she can help you out. Her phone number is: 800-462-5232 or email christy@lineofduty.com. Once you have confirmed your registration, log in on the left side of the screen under the Returning Members (shown in the above picture with the pink arrow).

Creating a new account: All * information must be filled out. We require the department name and state where it asks for the city / town information shown below by the yellow arrow. This allows the LOD staff member(s) who purge the site to recognize that you are a MIRMA member.

You can contact LOD staff member and they can set up the entire department. There is an Excel Spreadsheet that needs to be filled out with either all information or just First and Last Names and Email address. The LOD staff member can set up User Names and Passwords for the department if they so wish. Once all is done, it only takes a matter of minutes to load in an entire department. Most large departments do prefer LOD staff to do this for them as it guarantees everyone is in the system. Once in the system, our contact who emailed us the information will receive the spreadsheet back with all information filled in. Please keep in mind that sometimes the “easier” to remember User Names are taken so we need to fiddle with it until one is accepted.

**Instructor / Classroom Setting**

The Line of Duty Learning, for the most part, is set up for classroom instruction. There is a section with six (6) programs available that are set for instructorless, on your own video training. Once logged into the system EVERYONE is put into a “student” role. We do ask for a list of instructors upon subscribing to the training so that an LOD staff member can move those individuals into their appropriate “instructor” role which does allow a bit more perks. All tests / answer keys are kept under a lock for instructor use only, report gathering is available along with the program streaming instantly.

**Student Roles**

Students will have access to Discussion Forums, Streaming Video Courses and Lesson Plans. Each individual must have their Enrollment or Group Key, which is assigned by an LOD staff member, available to unlock and enroll into the programs. This process is done one (1) time per video. After the initial enrollment, a student can go back as many times as they like.
Locating the Program

Usually, but not always, instructors will assign a particular program to review. After logging into the system, the below screen will appear. We call it our “film strip” page. Underneath the Course Categories are the volumes (shown by the orange arrow) of programs available to everyone. The number in black to the right indicates the number of programs within that volume (shown by the red arrow). There are usually 12 programs (coinciding with one per month) in each of the volumes. Special Issues are stand alone training programs that LOD has done on the side.

There is also a search engine that can be used, just like any other search engine. Type in a word and the titles of programs will show up for you. The search engine can be found on either the “film strip” page underneath all the red links or on the program title page (as shown above on the previous page).
Enrollment Key

Once a program is selected from the list, the system will ask for the enrollment key. The enrollment key for MIRMA participants is as follows: lodlmirma (that is LODL +MIRMA all lowercase and all together). Just type that in the space provided and click on the “Enroll me in this course” button. As stated this is done one (1) time per program.

Once an individual has enrolled into the course the video will start streaming.

All individuals will have access to the Program Synopsis (yellow arrow); Discussion Forums (Green Arrow) and the Duty Sheets / Trainers Guides (purple arrow). To get full screen access of the video itself, scroll over the program screen and a gray bar will pop up. Please note it does not stay very long. To the right of the gray bar is the icon for sound and just to the left of that is a box with arrows on the corners. Click that box (shown in picture below) and the video will go full screen.
On the left side of the screen, students will only see the “In the Line of Duty” and “My Courses” bullets.

**Instructor Role**

Like the students, instructors will have access to the Discussion Forums, Duty Sheets / Trainer Guides. The major difference is that they will also have access to the Test and Answer Key. Reports if needed, and the Enrollment Key does not apply to them, the video will start streaming automatically. Locating the program is the same as the student, use the search engine or just check out what is available.

The test and answer key are located right below the duty sheets / trainer’s guides. The “Administration” bullet will show up to the left of the screen. For MOST of the programs, the grades link will not work and we ask that instructors do not un-enroll from the courses since LOD staff enrolls them manually into all the programs. All tests, answer keys and trainer guides are in the PDF format at this time.
At this time with the reports, an instructor should assign a particular program. The system does not allow us to pull reports for all programs, just individual ones. Along with this manual, there is also an Instructional on how to retrieve reports for the instructors. Below is a quick shot of the information to fill in for a particular program. The system will generate a department's Enrollment / Group Key automatically.

Virtual Training

We currently have six (6) Virtual Training programs available to departments. Basically Virtual Training is instructorless. An individual logs into the LODL system like they always do. On the “film strip” page at the bottom will be the red link for the Virtual Training Courses. Students / Instructors can take these courses at any time. They watch part of the program, take a quiz and continue on. Individuals have 2 tries to pass the quiz before receiving a “review” from Ron Barber. With the VT courses, an individual can stop the program at any time for any reason. HOWEVER, once inside the quiz it must be taken in completion before they can do anything else. The quizzes are timed depending upon the number of questions.
Once all quizzes are finished, grades are recorded in the system for instructor use, an individual will receive and print out a Certificate of Completion. Everything is recorded, including time.

**SCORM (Sharable Content Object Reference Model) Compliant**

SCORM compliancy is basically a fancy way of saying we can hook our Learning Management System (LMS) to your current LSM for tracking purposes. The LODL website is SCORM compliant, so as long as a department has a current SCORM compliant LMS (eg: Blackboard, Moodle, etc), the systems can be linked together for easier tracking.
Conclusion

LODL is a productive, time saving, money saving way of training. It eliminates some of the need to bring in “outside” speakers to departments and sometimes the need for travel. Obviously each state has its own set of training requirements that must be done, but online learning is taking over. If any MIRMA participant has any questions, or needs further information, please do not hesitate to contact Christy at 800-462-5232 or email christy@lineofduty.com.
